Fundamental Considerations in Technology Mediated

Language Assessment Karim Sadeghi, Dan Douglas, 2023-04-27 Fundamental Considerations in Technology Mediated Language Assessment aims to address issues such as how the forced integration of technology into second language assessment has shaped our understanding of key traditional concepts like validity reliability washback authenticity ethics fairness test security and more. Although computer assisted language testing has been around for more than two decades in the context of high stakes proficiency testing much of language testing worldwide has shifted to at home mode and relies heavily on the mediation of digital technology making its widespread application in classroom settings in response to the COVID 19 outbreak unprecedented. Integration of technology into language assessment has brought with it countless affordances and at the same time challenges both theoretically and practically. One major theoretical consideration requiring attention is the way technology has contributed to a reconceptualization of major assessment concepts constructs. There is very limited literature available on the theoretical underpinnings of technology mediated language assessment. This book aims to fill this gap. This book will appeal to academic specialists practitioners or professionals in the field of language assessment advanced and or graduate students and a range of scholars or professionals in disciplines like educational technology applied linguistics and teaching English to speakers of other languages TESOL

Reimagining

Communication: Action Michael Filimowicz, Veronika Tzankova, 2020-08-04 As a part of an extensive exploration Reimagining Communication Action investigates the practical implications of communication as a cultural industry media ecology and a complex social activity integral to all domains of life. The Reimagining Communication series develops a new information architecture for the field of communications studies grounded in its interdisciplinary origins and looking ahead to emerging trends as researchers take into account new media technologies and their impacts on society and culture. The diverse and comprehensive body of contributions in this unique interdisciplinary resource explore communication as a form of action within a mix of social cultural political and economic contexts. They emphasize the continuously expanding horizons of the field by engaging with the latest trends in practical inquiry within communication studies. Reflecting on the truly diverse implications of communicative processes and representations Reimagining Communication Action covers key practical developments of concern to the field. It integrates diverse theoretical and practice based perspectives to emphasize the purpose and significance of communication to human experience at individual and social levels in a uniquely accessible

and engaging way This is an essential introductory text for advanced undergraduate and graduate students along with scholars of communication broadcast media and interactive technologies with an interdisciplinary focus and an emphasis on the integration of new technologies

Algorithmic and Experimental Methods in Algebra, Geometry, and Number

Theory Gebhard Böckle,Wolfram Decker,Gunter Malle,2018-03-22 This book presents state of the art research and survey

articles that highlight work done within the Priority Program SPP 1489 Algorithmic and Experimental Methods in Algebra

Geometry and Number Theory which was established and generously supported by the German Research Foundation DFG

from 2010 to 2016 The goal of the program was to substantially advance algorithmic and experimental methods in the

aforementioned disciplines to combine the different methods where necessary and to apply them to central questions in

theory and practice Of particular concern was the further development of freely available open source computer algebra

systems and their interaction in order to create powerful new computational tools that transcend the boundaries of the

individual disciplines involved The book covers a broad range of topics addressing the design and theoretical foundations

implementation and the successful application of algebraic algorithms in order to solve mathematical research problems It

offers a valuable resource for all researchers from graduate students through established experts who are interested in the computational aspects of algebra geometry and or number theory
