Value Investing Tools And Techniques For Intelligent Investment:

Value Investing James Montier, 2009 As with his weekly column James Montier's Value Investing is a must read for all students of the financial markets In short order Montier shreds the efficient market hypothesis elucidates the pertinence of behavioral finance and explains the crucial difference between investment process and investment outcomes Montier makes his arguments with clear insight and spirited good humor and then backs them up with cold hard facts Buy this book for yourself and for anyone you know who cares about their capital Seth Klarman President The Baupost Group LLC The seductive elegance of classical finance theory is powerful yet value investing requires that we reject both the precepts of modern portfolio theory MPT and pretty much all of its tools and techniques In this important new book the highly respected and controversial value investor and behavioural analyst James Montier explains how value investing is the only tried and tested method of delivering sustainable long term returns James shows you why everything you learnt at business school is wrong how to think properly about valuation and risk how to avoid the dangers of growth investing how to be a contrarian how to short stocks how to avoid value traps how to hedge ignorance using cheap insurance Crucially he also gives real time examples of the principles outlined in the context of the 2008-09 financial crisis In this book James shares his tried and tested techniques and provides the latest and most cutting edge tools you will need to deploy the value approach successfully It provides you with the tools to start thinking in a different fashion about the way in which you invest introducing the ways of overcoming the emotional distractions that will bedevil the pursuit of a value approach and ultimately think and act differently from the herd

Value Stocks beat Growth Stocks: An empirical Analysis for the German Stock Market Christian Schießl, 2014-02-01 Based on a free of survivorship bias sample of German stocks listed at the Frankfurt stock exchange the study investigates the ability of hedge portfolio formation structures built of three value premium proxies P/B, P/E and DY, the size factor and the technical momentum factor to generate excess returns in the period 1992 to 2011 First the author characterizes and defines the significant terms that are in connection with value and growth investing He continues with the discussion of asset pricing with the CAPM, the Fama and French three factor model and the Carhart extension and then describes the expected stock returns that are of capital importance Moreover the author deals with related studies for the German stock market He gives a detailed description of the empirical analysis before he draws his conclusions The author's purpose is to answer the following core questions Is there a value premium in the German market between 1992 and 2011 Is there a reversed size premium like recent empirical findings suggest Do high momentum stocks perform better than low momentum stocks Is there a significant seasonal pattern in hedge portfolio returns The combination of which factors best explains expected stock returns
