Cerulo, 2008-09-15 People especially Americans are by and large optimists They re much better at imagining best case scenarios I could win the lottery than worst case scenarios A hurricane could destroy my neighborhood This is true not just of their approach to imagining the future but of their memories as well people are better able to describe the best moments of their lives than they are the worst Though there are psychological reasons

for this phenomenon Karen A Cerulo in *Never Saw It Coming* considers instead the role of society in fostering this attitude What kinds of communities develop this pattern of thought which do not and what does that say about human ability to evaluate possible outcomes of decisions and events Cerulo takes readers to diverse realms of experience including intimate family relationships key transitions in our lives the places we work and play and the boardrooms of organizations and bureaucracies Using interviews surveys artistic and fictional accounts media reports historical data and official records she illuminates one of the most common yet least studied of human traits a blatant disregard for worst case scenarios *Never Saw It Coming* therefore will be crucial to anyone who wants to understand human attempts to picture or plan the future In *Never Saw It Coming* Karen Cerulo argues that in American society there is a positive symmetry a tendency to focus on and exaggerate the best the winner the most optimistic outcome and outlook Thus the conceptions of the worst are underdeveloped and elided Naturally as she masterfully outlines there are dramatic consequences to this characterological inability to imagine and prepare for the worst as the failure to heed memos leading up to both the 9 11 and NASA Challenger disasters for instance so painfully reminded us Robin Wagner Pacifici Swarthmore College Katrina 9 11 and the War in Iraq all demonstrate the costliness of failing to anticipate worst case scenarios *Never Saw It Coming* explains why it is so hard to do so adaptive behavior hard wired into human cognition is complemented and reinforced by cultural practices which are in turn institutionalized in the rules and structures of formal organizations But Karen Cerulo doesn't just diagnose the problem she uses case studies of settings in which people effectively anticipate and deal with potential disaster to describe structural solutions to the chronic dilemmas she describes so well *Never Saw It Coming* is a powerful contribution to the emerging fields of cognitive and moral sociology Paul DiMaggio Princeton University Lab Manual for A+ Guide to Software Jean Andrews,2003-03 Designed to accompany the A Guide to Software this Lab Manual provides additional hands on practice need to succeed in industry and is an excellent resource to prepare for CompTIA's 2003 A+ OS Technologies certification exam Instructor Edition Andrews,2005-04 **Microsoft® Windows® XP Guide** Jean Andrews,2001 The Microsoft Windows XP guide is designed to accompany Enhanced A Guide to Managing and Maintaining Your PC It contains an additional chapter Chapter 21 for currency on this hot new operating system and provides an in depth look at installing supporting and troubleshooting Windows XP Professional Back cover **Courseprep Studyguide** Course Technology Staff,2000-10 **Enhanced A+ Courseprep Examguide** Jean Andrews,2001 **Books in Print Supplement** ,2002 *Forthcoming Books* Rose Arny,2003-04 **The Software Encyclopedia 2000** Bowker Editorial Staff,2000-05 Management Arthur G.
