A Supply Chain Management Guide to Business Continuity Chapter 3: Business Continuity Best Practices , **A Supply Chain Management Guide to Business Continuity** Betty A. Kildow,2011-01-12 A well monitored supply chain is any

business's key to productivity and profit. But each link in that chain is its own entity subject to its own ups and downs and business realities. If one falters every other link and the entire chain becomes vulnerable. Kildow's book identifies the different phases of business continuity program development and maintenance including Recognizing and mitigating potential threats, risks and hazards; Evaluating and selecting suppliers, contractors and service providers; Developing, testing, documenting and maintaining business continuity plans; Following globally accepted best practices; Analyzing the potential business impact of supply chain disruptions; Filled with powerful assessment tools, detailed disaster preparedness checklists and scenarios and instructive case studies in supply chain reliability. **A Supply Chain Management Guide to Business Continuity** is a crucial resource in the long term stability of any business. When Disaster Strikes... A Guideline to Business Continuity Awareness Patrick Hermann, 2008-05 Diploma Thesis from the year 2006 in the subject Business economics Business Management Corporate Governance grade 2.0 Nürtingen University BWL 38 entries in the bibliography language English abstract When there is a crisis the crisis has to be managed was once said by Gerhard Schröder the former German Chancellor. In actual disaster situations it is not as easy to handle the crisis and just manage it; you better be prepared. When disaster strikes these incidents cannot usually be handled with the organizational structures and resources provided for normal everyday business and therefore require a business continuity plan. As we have experienced an increasing number of disaster events over the recent years, big and dramatic events like the World Trade Center terrorist attack of 9/11, the Madrid and London train bombings, earthquakes in Pakistan, hurricanes in North America or the Southeast Asia tsunami which were highly recognized in the media all over the world. But at the same time there have been also large number of disasters at a less recognized level like fires, flooding, building crush down and so forth. All these events have one thing in common: They can put a company out of business. To prevent that we are not prepared to respond to these disaster events we need to have a plan. But planning for an event can only be the first step; next we need to implement these plans in our organization and make communicate it to ensure that every employee knows what to do and how to react in a disaster event. Many organizations fail to actually implement a BCP program because of the perception that it is a process that is too costly, time consuming and requires a large amount of resources. Therefore the management must be assured that by investing in BCP the organization's life gets protected and that it makes good business sense.
