**A History of Seafaring Based on Underwater Archaeology** George Fletcher Bass,1972     *A History of seafaring*  
George F. Bass,1972     **A Maritime Archaeology of Ships** J. R. Adams,2013-12-11 In the last fifty years the investigation of maritime archaeological sites in the sea in the coastal zone and in their interconnecting locales has emerged as one of archaeology's most dynamic and fast developing fields. No longer a niche interest, maritime archaeology is recognised as having central relevance in the integrated study of the human past. Within maritime archaeology, the study of watercraft has been understandably prominent and yet their potential is far from exhausted. In this book Jon Adams evaluates key episodes of technical change in the ways that ships were conceived, designed, built, used and disposed of. As technological puzzles, they have long confounded explanation but when viewed in the context of the societies in which they were created, mysteries begin to dissolve. Shipbuilding is social practice and as one of the most complex artefacts made, changes in their technology provide a lens through which to view the ideologies, strategies and agency of social change. Adams argues that the harnessing of shipbuilding was one of the ways in which medieval society became modern and while the primary case studies are historical, he also demonstrates that the relationships between ships and society have key implications for our understanding of prehistory in which seafaring and communication had similarly profound effects on the tide of human affairs.

**Reconstructing a Maritime Past** Matthew Harpster,2022-12-30 Reconstructing a Maritime Past argues that rather than applying geo-ethnic labels to shipwrecks to describe Greek or Roman seafaring, a more intriguing alternative emphasizes a maritime culture's valorization of the Mediterranean Sea. Doing so creates new questions and research agendas to understand the past human relationship with the sea. This study makes this argument in three sections. Chapters 1 and 2 contrast intellectual histories of maritime archaeological interpretive approaches common in Northern Europe and the Mediterranean, proposing that the former perspective, which embodies contemporary and fluid perceptions of culture, is a better theoretical framework for future research. Chapters 3-5 re-interpret the corpus of submerged sites in the Mediterranean Sea with this approach, arguing that this dataset does not represent Phoenician, Muslim, or Byzantine seafaring, but the practices of a maritime culture. Key to this section is the author's method that utilizes superimposed polygons to model patterns of maritime activity, generating centennial results at different scales. Having built the models of a maritime culture's valorization of the Mediterranean Sea, Chapter 6 contains the first comparisons of these models to other datasets, questioning the relevance of textual media to understand maritime activity while finding closer analogues with other archaeological corpora. By deconstructing interpretive methods in maritime archaeology, offering a new synthesizing interpretive approach that is scalable and decoupled from past perceptions, and critically examining the applicability of various media to illuminate the past maritime experience, this book will appeal to scholars at various stages of their careers.     **Maritime Archaeology**  
Keith Muckelroy,1978 Maritime archaeology, the scientific investigation of the relics of past ships and seafaring, has come

into being as a distinctive sub discipline of archaeology only since the wartime invention of the aqualung Keith Muckleroy sets out to define maritime archaeology highlighting on the one hand factors that are unique to working under water and on the other problems of interpretation and method that are shared with its parent discipline archaeology

**The Oxford Handbook of Maritime Archaeology** Alexis Catsambis, Ben Ford, Donny L. Hamilton, 2014-02 This title is a comprehensive survey of maritime archaeology as seen through the eyes of nearly fifty scholars at a time when maritime archaeology has established itself as a mature branch of archaeology

**Our Blue Planet** Ben Ford, Jessi J. Halligan, Alexis Catsambis, 2020

Our Blue Planet provides a comprehensive introduction to the field of maritime and underwater archaeology. Situating the field within the broader study of history and archaeology this book advocates that an understanding of how our ancestors interacted with rivers lakes and oceans is integral to comprehending the human past. Our Blue Planet covers the full breadth of maritime and underwater archaeology including formerly terrestrial sites drowned by rising sea levels coastal sites and a wide variety of wreck sites ranging across the globe and spanning from antiquity to World War II. Beginning with a definition of the field and several chapters dedicated to the methods of finding recording and interpreting submerged sites Our Blue Planet provides an entry point for all readers whether or not they are familiar with maritime and underwater archaeology or archaeology in general. The book then shifts to a thematic approach with chapters exploring human interactions with the watery world both along the coasts and by ship. These chapters discuss the relationships between culture technology and environment that allowed humans through time to spread across the globe. Because ships were the primary means for humans to interact with large bodies of water they are the focus of several chapters on the development of shipbuilding technology the lives of sailors and the uses of ships in exploration expansion and warfare. The book ends with chapters on how and why the non renewable submerged archaeological record should be managed so that both current and future generations can learn from the achievements and failures of past societies as well as on how anyone can become involved in maritime and underwater archaeology. Throughout the reader benefits from the personal reflections of a number of leading figures in the field

*The Oxford Encyclopedia of Maritime History: Actium, Battle of* John B. Hattendorf, 2007 Here is an encyclopedia of maritime history that in scope and depth rivals the expansiveness of the sea itself. The Encyclopedia covers the entire history of seafaring from ancient Egyptian shipbuilders to Viking sea raiders from Nelson and the Napoleonic Wars to the voyages of Cheng Ho from the European conquerors of the New World to the nuclear submarines and supertankers of today. Placing maritime affairs in their larger historical context the Encyclopedia shows how seafaring has both reflected and influenced the major economic cultural military and political developments in world history. In four volumes and nearly 1 000 signed articles by an international group of historians and naval officers the Encyclopedia offers a uniquely integrated approach emphasizing the connections between maritime history and many related fields including naval history shipbuilding navigation and scientific instrumentation maritime art and literature commerce and economics exploration and maritime

geography oceanography and hydrology and international maritime law In so doing the Encyclopedia provides in a single reference work a wealth of information that can otherwise be found only with the help of an extensive library Alphabetical organization intelligible writing plentiful illustrations cross references bibliographies a synoptic outline and topical index all make The Oxford Encyclopedia of Maritime History an inviting easy to use reference for researchers and enthusiasts alike
