## 2014 Released 8th Grade Eog:

### Single Membrane Channels Formed by Connexins or Pannexins: Focus on the Nervous System Juan Andrés

Orellana, 2016-09-26 Given that the extremely elaborated and dynamic functions performed by the nervous system require the close synchronization of brain cells complex organisms have developed different mechanisms of intercellular communication At this regard paracrine signaling between neighboring cells is currently recognized as one of the most widely distributed mechanisms of synchronization in the brain parenchyma In mammals paracrine signaling is in part mediated by single membrane channels formed by connexins connexons hemichannels or pannexins pannexons which are two different membrane protein families composed of about 20 and 3 members respectively Single membrane channels formed by these proteins serve as aqueous pores permeable to ions and small molecules allowing the diffusional exchange between the intra and extracellular milieu Thus connexin hemichannels and pannexons permit the release of significant quantities of autocrine paracrine signaling molecules e g ATP glutamate NAD adenosine and PGE2 into the extracellular milieu as well as the uptake of small molecules An increasing body of evidence has revealed that connexin hemichannels and pannexons play a crucial role in a plethora of brain processes including blood flow regulation Ca2 wave propagation memory consolidation glucose sensing and cell migration and adhesion Considering the multiple cell signaling functions of these channels their dysregulation is proposed not only as potential pathological biomarker but it has been implicated in the pathogenesis and progression of diverse brain diseases e g meningitis Alzheimer's disease and stroke The aim of this Research Topic is to gather a collection of original research articles method protocols short communications opinions perspectives as well as review articles providing the latest progress and insights in the field of connexin hemichannels and pannexons in the nervous system Within this volume we plan to cover from basic research including channel structure regulation pharmacology and trafficking to different biological functions in the physiology behavior plasticity neurogenesis blood flow control neuron glia crosstalk cell migration and differentiation as well as in the pathophysiology neuroinflammation mutation related diseases glial dysfunction and neurodegeneration of the nervous system We hope that this collection of articles will serve to understand how the signaling of connexin hemichannels and pannexons influences both normal and pathological brain function

### *Rationality and Scientific Lifestyle for Health* Ali Akbar

Moosavi-Movahedi, 2021-07-10 This book argues that to be healthy human beings should love nature and stay in balance with it as much as possible In other words do not unbalance nature so that your own balance is not disturbed The best and healthiest way for human beings to live is to find balance in life and nature In this regard the book discusses useful nutritious functional foods nutraceuticals and antioxidants and how natural molecules which are provided by nature can be the best medicine for human beings At a molecular level stress is defined by the presence of unbalanced free radicals in the body Most diseases especially type 2 diabetes which accounts for the majority of diabetics can be traced back to this problem Our

scientific evidence indicates that type 2 diabetes isn't just a disease resulting from sugar but also from stress. The book seeks to promote a healthier lifestyle by considering the psychoemotional dimension of wellness. And finally, it contends that good sleep is at the root of health and happiness for humanity and that unbalanced free radicals are expelled from the body during restful sleep. The authors hope that this book will be a helpful guide and source of peace for readers, especially given their need for inner calm during the COVID 19 pandemic and that the suggestions provided will show them the way to a better life.
