## **A Framework For Measuring Intangible Assets:**

**A Framework for Measuring Intangible Assets** Sudhir Warier, 2014-10-16 Intellectual Capital remains the most unexploited resource within an organization Knowledge continues to be seen as a static organizational asset This is especially true for organizations in the Indian subcontinent The tremendous growth in the different fields of management and research contributions in the last decade have not helped in addressing all the limitations in measurement models The framework presented in this book builds on the advantages and the robustness of the Balanced Score Card while doing away with some of its primary limitations namely rigidity traditional financial measures lack of employee perspective etc The deployment of Intellectual Capital measurement Economic Value Added and Human Resource Accounting techniques within the modified six dimensional framework is unique and provides a more holistic measurement framework **Identifying, Measuring, and Valuing Knowledge-Based Intangible Assets: New Perspectives** Vallejo-Alonso, Belen, Rodriguez-Castellanos, Arturo, Arregui-Ayastuy, Gerardo, 2010-10-31 The main scope of the book is to highlight the importance of intangible resources in business management evidenced in their measurement and financial valuation and the need for a strategic analysis that enables them to be identified and then assessed Provided by publisher **Managing Knowledge Assets and Business Value Creation in Organizations: Measures and Dynamics** Schiuma, Giovanni, 2010-11-30 Managing Knowledge Assets and Business Value Creation in Organizations Measures and Dynamics provides an advanced state of the art understanding of the links between the knowledge assets dynamics and the business value creation This publication focuses on the theory models approaches methodologies tools and techniques for measuring and managing organizational knowledge assets dynamics supporting and driving business performance improvements This comprehensive work is a substantial contribution to the field in terms of theory methodology and applications to replicate support and challenge existing studies and offer new applications of existing theory and approaches **Knowledge Potential Measurement and Uncertainty** Kerstin Fink, 2012-12-06 Kerstin Fink discusses the two mainstream measurement fields the cognitive science approach and the management approach She develops the knowledge potential view which is determined by nine key measurement variables i e content culture networking organizational knowledge learning and training customer and competitor knowledge and knowledge management systems *ECKM2014-Proceedings of the 15th European conference on Knowledge Management* Carla Vivas, 2014-10-01 The world economy in which we are living poses challenges that lead to a realization that more of the same will be difficult to sustain This provides an illustration that in order to create new or modified knowledge practices strengthen customer relationships and thus positively influence customer satisfaction organizations must be flexible in configuring combining knowledge and knowledge structures in a way that is appropriate for delivering value to the customer It must simultaneously develop effective strategies for updating the knowledge of its staff members necessary for underpinning the creation and delivery of appropriate knowledge services Thus unlearning forgetting

becomes a critical means for organizational success The ECKM community of scholars has already initiated dialogue that links its particular strengths to innovation issues This conference aims to further that dialogue by attracting leading edge work that leverages the ECKM community's in depth understanding of learning and unlearning to better understand knowledge management Our aim is to stimulate breakthrough research streams linking learning unlearning and knowledge management How can organizations tailor use and extend techniques and tools from knowledge management for improving their business practices and processes Building upon existing work on knowledge management KM and organizational learning the conference will promote interdisciplinary approaches from computer science and information systems business management and organization science as well as cognitive science Emphasis will be put on systematic learning from experience KM tools and KM success factors A special interest belongs to knowledge management initiatives which are lightweight i e do not place considerable additional burden on users and KM experts allow an incremental adoption i e do not require large up front investment before any return of investment is at least visible and are flexible regarding frequent changes in experts and topics Continuing the success of the ECKM conference series since 2000 the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge intensive organizations *Fair Value*

Abernathy,2003 Accounting regulators are grappling with the trade offs between the relevance of external financial reports and maintaining the reliability and verifiability of the information provided The question is how to incorporate more financial information about intangibles into the external financial reporting and the internal systems without reducing the usefulness of the data due to measurement error This paper address that question by developing a coherent framework for the classification recognition and reporting of intangible assets that is based on sound economic principles     **Competitiveness and the Value of Intangible Assets** Pierre-André Buigues,Alex Jacquemin,Jean-François Marchipont,2000 A theoretical and empirical analysis of intangible investment and its effect on public policy in Europe The authors find that the growing importance of intangibles is transforming the direction of public policies in Europe particularly industrial R D competition and trade policies     **Journal of Information Science** ,2006     ICICKM2012-Proceedings of the 9th International Conference on Intellectual Capital, Knowledge Management and Organisational Learning Fernando Chaparro,2012     **A Framework for Measuring the Value-added of Knowledge Processes with Analysis of Process**

**Interactions and Dynamics** José Cintrón, 2013 The most known and widely used methods use cash flows and tangible assets to measure the impact of investments in the organization's outputs. But in the last decade many newer organizations whose outputs are heavily dependent on information technology utilize knowledge as their main asset. These organizations' market values lie on the knowledge of its employees and their technological capabilities. In the current technology-based business landscape the value added by assets utilized for generation of outputs cannot be appropriately measured and managed without considering the role that intangible assets and knowledge play in executing processes. The analysis of processes for comparison and decision making based on intangible value added can be accomplished using the knowledge required to execute processes. The measurement of value added by knowledge can provide a more realistic framework for analysis of processes where traditional cost methods are not appropriate, enabling managers to better allocate and control knowledge-based processes. Further consideration of interactions and complexity between proposed process alternatives can yield answers about where and when investments can improve value added while dynamically providing higher returns on investment.

**The Strategy Map for General Electric Medical Systems, 2002** Nadine Pahl, 2009-03-27 Research Paper undergraduate from the year 2008 in the subject Business economics Business Management Corporate Governance grade 1.3 University of Applied Sciences Berlin Master of Business Administration course Strategic Management language English abstract If you take the words of a former General Electric's GE employee to define strategy William E. Rothschild said: "What do you want to achieve or avoid? The answers to this question are objectives. How will you go about achieving your desired results? The answer to this you can call strategy." This statement not only highlights the need for strategy but also the need to bring strategy to fruition. Companies should not only devise strategy but also successfully clarify and execute their strategies. This means that a company has to be able to measure its strategic success. Unfortunately, company strategy is not always transparent or understood in the same way by a company's key players. Sun Tzu, a Chinese military strategist who wrote the military treatise *The Art of War*, praised this aspect for strategies in war as follows: "All men can see these tactics whereby I conquer, but what none can see is the strategy out of which victory is evolved." The Strategy Map created by Kaplan and Norton is to facilitate corporate strategy development and execution, providing a missing link between strategy formulation and strategy implementation by identifying the key internal processes that drive strategic success and by aligning investment in people, technology, and organizational capital for the greatest impact. The first part of the assignment describes in detail the theoretical framework of Strategy Maps. The second part uses the theory to describe and visualize the Strategy Map of General Electric Medical Systems (GEMS), the world's leading manufacturer of diagnostic imaging equipment. This practical approach is based on the publication of Tarun Khanna about GEMS in the Harvard Business School Press in February 2003. In conclusion, there is a brief up-to-date situation on GEMS after 2002 and some statements to the author's experience in creating the GEMS Strategy Map.
