NEW BIKE, new riding impressions? You betcha! The classic R1100RT that's changing head-to-head racing will be discontinued at the end of the year to be joined in a growing line-up motorcycle offerings at BMW.

The R1100RT is a continuation model of the R1100R, and a limited edition model in the bike's 10th year family of motorcycle offerings. You might be thinking the R1100R is the more popular version. However, the R1100RT is almost identical with a standard developed 600-cubic-inch boxer engine, offering impressive and lasting road grip. It also comes at a slightly higher price of \$6,790, making it

the more expensive. However, in my opinion, the "RT" is a great 10 years in the game.

With its ergonomics, comfortable seating, a three-spoke aluminum wheel and an extremely comfortable ride, BMW is among the standard leaders in one of today's most popular motorcycle classes. BMW's innovative Telelever front and rear suspension system, standard on the engine cases (not where the cylinder heads are connected with the cylinder), provides rear suspension, which all the other manufacturers have had to follow.

The RT is powered by the same 600cc, triple-cam engine found in the R1100R, R1100RS and R1100GS, which like the other standard BMWs, offers a claimed 60 horsepower and 60 lb-feet of torque at the crankshaft. The 600cc model, which needs 90 octane gasoline and 40 lb-feet pounds of torque at the rear wheel.

BMW's triple-cam technology, the R1100RT's three-cylinder engine, and its high level of craftsmanship is evident. For example, the all-new triple glass is visible through the left panel, the leather seats match both the handle bars and the floor board, and are easily removed by loosening the nuts. There's a full complement of easy-to-fit gauges, running lights and a liquid-cooled boxer that reduces the temperature, don't forget and gets you to 60 miles per hour in under 10 seconds.

Lighter than the R1100R, the three-cylinder combination weighs in at a shade lighter than a R1100R, which means it's nearly identical in weight to the R1100GS. The triple engine, which offers instant torque, starts from 3,000 rpm and reaches 60-70 mph in 3.5 seconds. The gear selection is also adjustable by shifting with an electronic control located just off of the left handle.

When in use, the three-cylinder R1100RT immediately sets out enough of torque to allow you to start and make a long, smooth pickup. Like the R1100R, the R1100RT is strong to handle elevation at 6,000 feet per night in
