**Systems Biology: Simulation of Dynamic Network States** Bernhard Ø. Palsson, 2011-05-26 Biophysical models have been used in biology for decades but they have been limited in scope and size In this book Bernhard Palsson shows how network reconstructions that are based on genomic and bibliomic data and take the form of established stoichiometric matrices can be converted into dynamic models

using metabolomic and fluxomic data The Mass Action Stoichiometric Simulation MASS procedure can be used for any cellular process for which data is available and allows a scalable step by step approach to the practical construction of network models Specifically it can treat integrated processes that need explicit accounting of small molecules and protein which allows simulation at the molecular level The material has been class tested by the author at both the undergraduate and graduate level All computations in the text are available online in MATLAB and Mathematica workbooks allowing hands on practice with the material

**Systems Biology** Bernhard Palsson, 2011 Master the process of building MASS models with real examples and hands on practice
