Vemuri,2024-09-12 OHIO OST 6th Grade MATH Practice Tests Volume 1 **Matrix Mathematics CBSE Class 04** Saroja Sundararajan & Jayanthi Ravi, Matrix Mathematics CBSE Class 04 **Constructing "race" and "ethnicity" in America** Dvora Yanow,2002-11-07 What do we mean in the U S today when we use the terms race and ethnicity What do we mean and what do we understand when we use the five standard race ethnic categories White Black Asian Native American and Hispanic Most federal and state data collection agencies use these terms without explicit attention and thereby create categories of American ethnicity for political purposes Davora Yanow argues that race and ethnicity are socially constructed concepts not objective scientifically grounded variables and do not accurately represent the real world She joins the growing critique of the unreflective use of race and ethnicity in American policymaking through an exploration of how these terms are

used in everyday practices Her book is filled with current examples and analyses from a wealth of social institutions health care education criminal justice and government at all levels The questions she raises for society and public policy are endless Yanow maintains that these issues must be addressed explicitly publicly and nationally if we are to make our policy and administrative institutions operate more effectively

Girls Have Academic Advantages and So Do Boys Jodie Fonseca, Laiba Bahrawar, Margaret M. Dubeck, Yasmin Sitabkhan, Christopher Cummiskey, Devanshi Unadkat, 2023-05-15 This paper contains a new analysis of gender differences in early grade reading and mathematics outcomes in 19 USAID funded studies over the past decade from 14 locations in Africa Asia Latin America and the Middle East The paper addresses gaps in the literature related to learning patterns for girls and boys in lower and middle income countries and in early primary school We analyzed the results from reading and mathematics assessments in grades 2 and 3 including differences in oral reading fluency ORF and quantitative comparison scores between boys and girls as well as differences in score distributions by gender In line with results from assessments in upper grades and in wealthier countries we found that girls consistently outperformed boys in reading In mathematics boys slightly outperformed girls although the differences were typically not large Global experience has shown that patterns in poor performance become more entrenched the further learners progress through the grades suggesting that early interventions for boys in reading and girls in mathematics could have long term benefits At the same time both girls and boys typically score below expectations in the two subjects across countries necessitating targeted strategies to improve outcomes for both genders early in their educational trajectories 7

Substance Misuse Prevention Program Attendance Marni L. Kan,Hsiu Chen Yeh, Lisa M. Schainker,Jessica Nelson,Samantha Charm,Cleve Redmond,Richard Spoth,2022-12-19 Typical life circumstances for military families may impact their participation in prevention programs yet little is known about what factors influence their participation The current study examined predictors of attendance in the Strengthening Families Program For Parents and Youth 10 14 for Military Families a universal in person program designed to improve family functioning and reduce youth substance misuse and other problem behaviors Participants included 159 parent child dyads randomly selected to be offered the 7 week family program Analyses examined demographic characteristics deployment experiences time spent waiting for the program to begin and psychosocial functioning as predictors of attendance in a series of regression models Of the 39 percent of families that attended any program sessions the majority 71 percent attended at least four of the seven sessions Attendance varied significantly across the geographic areas in which groups were held Prior service utilization youth conduct problem behavior parental history of deployment and family conflict were each positively associated with attendance whereas parent tobacco use was negatively associated with attendance These results highlight the challenges in recruiting military families into in person prevention programs and suggest that extra efforts may be needed to engage families that do not perceive that they have a need for support
