Patry, 2018-11-24 This highly accessible volume tours the competencies and challenges relating to contemporary mental health service delivery in correctional settings. Balancing the general and specific knowledge needed for conducting effective therapy in jails and prisons, leading experts present eclectic theoretical models, current statistics, diagnostic information and frontline wisdom. Evidence-based practices are detailed for mental health assessment, treatment and management of inmates including specialized populations: women, youth and offenders with specific pathologies. Sexual offenders, psychopaths, and readers are reminded that correctional psychology is in an evolutionary state adapting to the diverse needs of populations and practitioners in the context of reducing further offending. Included in the coverage: Assessing and treating offenders with mental illness, substance use disorders in correctional populations, Assessing and treating offenders with intellectual disabilities, Assessing and treating those who have committed sexual offenses, Self-harm, suicidality in corrections, Correctional staff, The issue of job stress. *The Practice of Correctional Psychology* will be of major interest to psychologists, social workers, and master's level clinicians and students who work in correctional institutions and settings with offenders on parole or probation, as well as other professionals within the correctional system who work directly with offenders such as probation officers, parole officers, program officers, and corrections officers.

**Promoting Wellness and Resiliency in Correctional Officers** Hayden P. Smith, 2022-12-26 Correctional officers face considerable stress, risk, and danger that lead to poor physical and mental health outcomes. In fact, their life expectancy is 15 years shorter than the national average. Public perception and media portrayals of correctional officers tend to reinforce stereotypes of brutish, improper, and uncontrolled behavior. Yet, the reality is that correctional officers are operating a default public and mental health system for a sizeable portion of our society, a responsibility that exposes them to considerable risk. These negative effects have been compounded by an international staffing crisis that has made our jails and prisons far less safe for working officers. To address this situation, this book features an examination of a combined 11,313 correctional officers and 42 of their family members in the United States, Canada, and Europe. It explores proactive strategies that can reduce rates of posttraumatic stress disorder (PTSD) in correctional officers, which currently surpasses those found in

returning military veterans who experienced combat It then delves into the dynamics of correctional officer suicide featuring the perspectives of their families This book highlights innovative approaches that can build on existing strengths including the role of international exchange programs It presents universal themes that impact the safety wellbeing and resiliency of correctional officers along with positive outcomes related to evidence based programs that maximize health in the correctional workplace This book will be of interest to researchers and advanced students of criminology mental health public policy social work and sociology The chapters in this book were originally published as a special issue of the journal Criminal Justice Studies     **"Code of Massachusetts regulations, 2013"** ,2013 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020
