Criminology Stephen E. Brown, Finn-Aage Esbensen, Gilbert Geis, 2024-06-26 *Criminology: Explaining Crime and Its Context*, Eleventh Edition, offers a broad perspective on criminological theory. It provides students of criminology, criminal justice, and sociology with a thorough exposure to a range of theories about crime, contrasting their logic and assumptions but also highlighting efforts to integrate and blend these frameworks. In this new edition, the authors have incorporated new directions that have gained traction in the field while remaining faithful to their criminological heritage. Among the themes in this work are the relativity of crime, its changing definition, with abundant examples, historical roots of criminology, and the lessons they have provided, and the strength and challenges of applying the scientific method. This revision offers new chapters on critical theory and on life course criminology. It is updated throughout to reflect current trends in criminological theory and data. With chapters both updated to reflect recent developments in the field and made easier to digest, this text is essential reading for students of criminology, criminal justice, sociology, and related fields.

Envisioning Criminology Michael D. Maltz, Stephen K. Rice, 2015-06-09 This book covers research design and methodology from a unique and engaging point of view based on accounts from influential researchers across the field of Criminology and Criminal Justice. Most books and articles about research in criminology and criminal justice focus on how the research was carried out, the data that were used, the methods that were applied, the results that were achieved. While these are all important, they do not present a complete picture. *Envisioning Criminology: Researchers on Research as a Process of Discovery* aims to fill that gap by providing nuance, the back story of why researchers selected particular problems, how they approached those problems, and how their background, training, and experience affected the approaches they took. As the contributions in this book demonstrate, research is not a cut-and-dried process, as all too many methods books imply, but a living, breathing, and in some ways quirky process that is influenced by non-scientific factors. The path taken by a researcher is important, and an appreciation of his or her background, experience, knowledge, and the setbacks and triumphs of performing the research provides a much more complete picture of how research is done. The twenty-eight chapters in this book describe the back stories of their authors, which serve to enlighten readers about the interplay between the personal and the methodological. While primarily aimed as a textbook, this work will also be of interest to researchers in Criminology and Criminal Justice and related Social and
