MARKS: 150

TIME: 2 Hours

MARKING PRINCIPLES

1. Penalties for foreign items are applied only if the candidate is not losing marks elsewhere in the question for that item (no foreign item penalty for misplaced item). No double penalty applied.
2. Penalties for placement or poor presentation (e.g. details) are applied only if the candidate is earning marks on the figures for that item.
3. Full marks for correct answer. If the answer is incorrect, mark the workings provided.
4. If a pre-adjustment figure is shown as a final figure, allocate the part-mark for the working for that figure (not the method mark for the answer).
5. Unless otherwise indicated, the positive or negative effect of any figure must be considered to award the mark. If no + or – sign or bracket is provided, assume that the figure is positive.
6. Where indicated, part-marks may be awarded to differentiate between differing qualities of answers from candidates.
7. This memorandum is not for public distribution; as certain items might imply incorrect treatment. The adjustments made are due to nuances in certain questions.
8. Where penalties are applied, the marks for that section of the question cannot be a final negative.
9. Where method marks are awarded for operation, the marker must inspect the reasonableness of the answer before awarding the mark.
10. 'Operation' means 'Check operation'. 'One part correct' means 'Operation & one part correct'.
Note: Check operation means must be +, –, x or ÷ as per memo.
Note: Where appropriate, use of numerator and denominator must be correctly applied to earn marks.
11. In awarding method marks, ensure that candidates do not get full marks for any item that is incorrect at least in part. In such cases, do not award the method mark. Indicate by way of ☒
12. Be aware that some candidates provide valid alternatives beyond the memorandum.
13. Codes: f = foreign item; p = placement/presentation.

Susan Parnell,Sophie Oldfield

2013 Goegraphy P1 November Grade10:

The Routledge Handbook on Cities of the Global South Susan Parnell, Sophie Oldfield, 2014-03-26 The renaissance in urban theory draws directly from a fresh focus on the neglected realities of cities beyond the west and embraces the global south as the epicentre of urbanism This Handbook engages the complex ways in which cities of the global south and the global north are rapidly shifting the imperative for multiple genealogies of knowledge production as well as a diversity of empirical entry points to understand contemporary urban dynamics The Handbook works towards a geographical realignment in urban studies bringing into conversation a wide array of cities across the global south the ordinary mega global and peripheral With interdisciplinary contributions from a range of leading international experts it profiles an emergent and geographically diverse body of work The contributions draw on conflicting and divergent debates to open up discussion on the meaning of the city in or of the global south arguments that are fluid and increasingly contested geographically and conceptually It reflects on critical urbanism the macro and micro scale forces that shape cities including ideological demographic and technological shifts and constantly changing global and regional economic dynamics Working with southern reference points the chapters present themes in urban politics identity and environment in ways that re frame our thinking about cities The Handbook engages the twenty first century city through a southern urban lens to stimulate scholarly professional and activist engagements with the city

Diversity of Urban Inclusivity Toshio Mizuuchi, Geerhardt Kornatowski, Taku Fukumoto, 2023-03-01 This book explores situations and discusses the contours of urban inclusivity amidst and beyond the well researched neoliberal turn in urban governance While it is generally accepted that urban social issues are susceptible to global woes these perceptions draw only limited attention to the plurality of interventions that cities undertake or facilitate in managing their social turfs By addressing the apparent lack of theorizations on everyday heterogeneities in urban place making especially in non Western contexts this book highlights the role of inclusionary practices by different stakeholders as an explicit pattern of urbanization It does so by focusing on old urban centralities that have an outspoken history in experimenting with inclusivity The book is guided by two interrelated questions 1 What particular urban settings promote inclusionary features in contrast to the conspicuous exclusionary mechanisms of market led urbanization and 2 how do we conceptualize these features in dialogue with concurrent urban theories that continue to grapple with the structural properties of exclusionary urbanization under the auspices of the neoliberal turn and gentrification To answer these questions the chapters provide a rich empirical account of inclusionary initiatives by the city governments the voluntary organization sector and informal communities each revealing a unique new set of spatial approaches to urban inclusivity The book concludes with the political implications of envisioning urban inclusivity as a negotiatory moment between key stakeholder interests in a capitalist society Primarily intended for researchers and graduate students in the fields of urban geography sociology migration and welfare studies the book is also a valuable source

for policymakers and practitioners in the fields of social planning and civil society at large Enabling Participatory Planning Gavin Parker, Emma Street, 2018-03-28 This book examines the challenges in delivering a participatory planning agenda in the face of an increasingly neoliberalised planning system and charts the experience of Planning Aid England In an age of austerity government spending cuts privatisation and rising inequalities the need to support and include the most vulnerable in society is more acute than ever However forms of Advocacy Planning the progressive concept championed for this purpose since the 1960s is under threat from neoliberalisation Rather than abandoning advocacy the book asserts that only through sustained critical engagement will issues of exclusion be positively tackled and addressed The authors propose neo advocacy planning as the critical lens through which to effect positive change This they argue will need to draw on a co production model maintained through a well resourced special purpose organisation set up to mobilise and resource planning intermediaries whose role it is to activate support and educate those without the resources to secure such advocacy themselves *Muslim Fashion* Reina Lewis, 2015-10-15 In the shops of London s Oxford Street girls wear patterned scarves over their hair as they cluster around makeup counters Alongside them hip twenty somethings style their head wraps in high black topknots to match their black boot cut trousers Participating in the world of popular mainstream fashion often thought to be the domain of the West these young Muslim women are part of an emergent cross faith transnational youth subculture of modest fashion In treating hijab and other forms of modest clothing as fashion Reina Lewis counters the overuse of images of veiled women as evidence in the prevalent suggestion that Muslims and Islam are incompatible with Western modernity *Muslim Fashion* contextualizes modest wardrobe styling within Islamic and global consumer cultures interviewing key players including designers bloggers shoppers store clerks and shop owners Focusing on Britain North America and Turkey Lewis provides insights into the ways young Muslim women use multiple fashion systems to negotiate religion identity and ethnicity **The Public Wealth of Cities** Dag Detter, Stefan Folster, 2017-07-18 How to leverage existing resources to meet the current and future needs of cities Crumbling streets and bridges Poorly performing schools and inadequate social services These are common complaints in cities which too often struggle just to keep the lights on much less make the long term investments necessary for future generations It doesn t have to be this way This book by two internationally recognized experts in public finance describes a new way of restoring economic vitality and financial stability to cities using steps that already have been proven remarkably successful The key is unlocking social human and economic wealth that cities already own but is out of sight or hidden A focus on existing public wealth helps to shift attention and resources from short term spending to longer term investments that can vastly raise the quality of life for many generations of urban residents A crucial first step is to understand a city s balance sheet too few cities comprehend how valuable a working tool this can be With this in hand taxpayers politicians and investors can better recognize the long term consequences of political decisions and make choices that mobilize real returns rather than rely on more taxes debt or austerity Another hidden asset is real estate Even

poor cities own large swathes of poorly utilized land or they control underperforming utilities and other commercial assets. Most cities could more than double their investments with smarter use of these commercial assets. Managing the city's assets smartly through the authors' proposed Urban Wealth Funds at arm's length from short-term political influence will enable cities to ramp up much needed infrastructure investments.

An Introduction to Sustainable Transportation Preston L. Schiller, Jeffrey Kenworthy, 2017-11-09. Cities around the globe struggle to create better and more equitable access to important destinations and services all the while reducing the energy consumption and environmental impacts of mobility. *An Introduction to Sustainable Transportation* illustrates a new planning paradigm for sustainable transportation through case studies from around the world with hundreds of valuable resources and references, color photos, graphics, and tables. The second edition builds and expands upon the highly acclaimed first edition with new chapters on urban design and urban regional and intercity public transportation as well as expanded chapters on automobile dependence and equity issues, automobile cities and the car culture, the history of sustainable and unsustainable transportation, the interrelatedness of technologies, infrastructure, energy, and functionalities, and public policy and public participation, and exemplary places, people, and programs around the globe. Among the many valuable additions are discussions of autonomous vehicles (AVs), electric vehicles (EVs), airport cities, urban fabrics, urban heat island effects, and mobility as a service (MaaS). New case studies show global exemplars of sustainable transportation, including several from Asia, a case study of participative and deliberative public involvement, as well as one describing life in the Vauban ecologically planned community of Freiburg, Germany. Students in affiliated sustainability disciplines, planners, policymakers, and concerned citizens will find many provides practical techniques to innovate and transform transportation.
