Narrating the Soviet Era in Russian School History Textbooks Olga Konkka, 2025-09-03 This study focuses on how Russian history textbooks published between 1992 and 2021 dealt with the topic of the Soviet period 1917-1991. Representations of this part of Russia's past in school manuals have provoked vivid debates and bolstered government intervention in the field while a gradual shift towards a less critical narrative of the USSR in more recent textbooks is often presented as directed by Vladimir Putin. This study combines research into these texts and inquiry into those who write, publish, approve or criticize them. Bringing together these perspectives provides a more complex view of school textbooks as final products of both top-down and bottom-up processes. This volume is aimed at postgraduate researchers and academics specializing in Soviet history, contemporary Russian politics and society and history education and textbooks. Celtic Art in Europe Christopher Gosden, Sally Crawford, Katharina Ulmschneider, 2014-08-29 The ancient Celtic world evokes debate, discussion, romanticism and mythicism. On the one hand it represents a specialist area of archaeological interest; on the other it has a wide general appeal. The Celtic world is accessible through archaeology, history, linguistics and art history. Of these disciplines art history offers the most direct message to a wider audience. This volume of 37 papers brings together a truly international group of pre-eminent specialists in the field of Celtic art and Celtic studies. It is a benchmark volume the like of which has not been seen since the publication of Paul Jacobsthal's *Early Celtic Art* in 1944. The papers chart the history of attempts to understand Celtic art and argue for novel approaches in discussions spanning the whole of Continental Europe and the British Isles. This new body of international scholarship will give the reader a sense of the richness of the material and current debates. Artefacts of rich form and decoration which we might call art provide a most sensitive set of indicators of key areas of past societies: their power, politics and transformations. With its broad geographical scope this volume offers a timely opportunity to re-assess contacts, context, transmission and meaning in Celtic art for understanding the development of European cultures, identities and economies in pre- and proto-history.
