*Operations Research in Production Planning and Control* Günter Fandel, Thomas Gulledge, Albert Jones, 2012-12-06 This proceedings volume contains selected and refereed contributions that were presented at the conference on Recent Developments and New Perspectives of Operations Research in the Area of Production Planning and Control in Hagen Germany 25-26 June 1992. This conference was organized with the cooperation of the Fernuniversität Hagen and was jointly hosted by the Deutsche Gesellschaft für Operations Research DGOR and the Manufacturing Special Interest Group of the Operations Research Society of America ORSA SIGMA. For the organization of the conference we received generous financial support from the sponsors listed at the end of this volume. We wish to express our appreciation to all supporters for their contributions. This conference was the successor of the JOInt ORSA DGOR conference in Gaithersburg Maryland USA on the 30 and 31 July 1991. Both OR societies committed themselves in 1989 to host joint conferences on special topics of interest from the field of operations research. This goal has been successfully realized in the area of production management and it should be an incentive to conduct similar joint conferences on other topics of operations research in the years to come. The 36 contributions in this proceedings volume deal with general and special problems in production planning as well as approaches and algorithms for their solution. They cover a wide range of operations research within product management and will therefore address a wide circle of interested readers among OR scientists and professionals alike.
