- Remember the saying 'necessity is the mother of the invention.' When the people need the things, sooner or later someone will come up with an idea to meet that need. It could be you!
- Watch people and notice their habits. How do they do the everyday activities, such as answering the phone, handling the money or the credit cards, eating and drinking? Is there a way that one of the activities could be made easier?
- When you have an idea, write it down. Draw a picture. Give it a name. This will help your mind work on the idea further.
- Don't talk to the negative people about your ideas. The motivation is important for the creativity, and negative people can kill it.
- Talk to a friend about your ideas. Some of the most successful ideas emerge through the talking.

Answer Key To Pearson:

TEXT BOOK OF BIOSTATISTICS AND RESEARCH METHODOLOGY Dr. Kapil Pal, Dr. Nidhi Sharma, Dr. Abhishek Dwivedi, Dr. Dipanwita Chaudhuri Sil; Dr. Rupesh Kumar Mani, 2025-04-25 The Textbook of Biostatistics and Research Methodology is a comprehensive guide designed for students, researchers, and professionals in pharmaceutical and biomedical sciences. It provides fundamental concepts and practical applications of statistical methods used in research and industry. The book begins with measures of central tendency covering mean, median, and mode with pharmaceutical examples helping readers understand data distribution in research. It then explores measures of dispersion including range and standard deviation which are crucial for analyzing variability in drug formulations and clinical studies. A dedicated section on correlation explains Karl Pearson's coefficient and multiple correlation techniques providing real world pharmaceutical applications. The regression analysis chapter covers curve fitting, least squares method, and multiple regression aiding in predictive modeling of drug responses. The book delves into probability distributions including binomial, normal, and Poisson distributions along with sampling techniques, hypothesis testing, and standard error concepts used in pharmaceutical research. Parametric tests such as t tests, ANOVA, and least significance difference methods are thoroughly explained for comparing sample groups in clinical trials. For non parametric analysis, tests like the Wilcoxon Rank Sum Test, Mann Whitney U Test, Kruskal Wallis Test, and Friedman Test are covered offering alternatives for non normally distributed data. The introduction to research methodology discusses the importance of experimental design, plagiarism, and ethical research practices. The book also covers graphical data representation through histograms, pie charts, cubic graphs, response surface plots, and contour plots enhancing statistical analysis visualization. The methodology design chapter includes sample size determination, data presentation, and protocol development for cohort and clinical studies. A section on regression modeling explains hypothesis testing in simple and multiple regression models incorporating industrial and clinical trial applications using Excel, SPSS, MINITAB, and R software. It also introduces the Design and Analysis of Experiments with factorial designs, response surface methodology, and optimization techniques. With its structured approach, practical pharmaceutical examples, and in depth statistical concepts, this textbook is an essential resource for students and professionals involved in biostatistics, clinical research, and pharmaceutical industry applications.
