<b>Interaction between objects when in contact.</b> These forces include gravity, tension, and magnetic forces.	<p>Gravity is a universal attractive force that acts on the mass of the Earth and on all other objects, pulling them toward the center of the Earth. Gravity is the force that pulls objects toward the center of the Earth. Gravity is the force that pulls objects toward the center of the Earth. Gravity is the force that pulls objects toward the center of the Earth.</p> <p>Electrostatic forces are interactions of the electric charges of objects. Attraction is experienced when one object has a positive charge and another has a negative charge. Repulsion is experienced when two objects have the same charge (both positive or both negative). Electrostatic forces are interactions of the electric charges of objects. Attraction is experienced when one object has a positive charge and another has a negative charge. Repulsion is experienced when two objects have the same charge (both positive or both negative). Electrostatic forces are interactions of the electric charges of objects. Attraction is experienced when one object has a positive charge and another has a negative charge. Repulsion is experienced when two objects have the same charge (both positive or both negative).</p> <p>Understanding these forces helps explain why the following objects and magnetic interactions happen. Define the force directions shown in the following forces.</p>	<p>What is the following an example of?             a. Attracting objects            b. Attracting objects with like charges            c. Repelling objects with like charges            d.
