addresses how the unexpected wave of recent teacher strikes has had a dramatic impact on American public education teacher unions and the larger labor movement Casey explains how this uprising was not only born out of opposition to government policies that underfunded public schools and deprofessionalized teaching but was also rooted in deep seated changes in the economic climate social movements and most importantly educational politics With an eye to maintaining the momentum of the insurgency the author examines four key strategic questions that have arisen from the strikes the relationship of mobilization to organizing the relationship between protests and direct action the conditions under which teacher strikes are most likely to be successful and the importance of bargaining for the common good More broadly Casey

examines how to organize teachers for collective action focusing on four discourses of teaching teaching as nurturance as professionalism as labor and craft and as a vocation of democratic intellectual work **Aeronautical Engineering** ,1993 A selection of annotated references to unclassified reports and journal articles that were introduced into the NASA scientific and technical information system and announced in Scientific and technical aerospace reports STAR and International aerospace abstracts IAA **International Reference Guide to Space Launch Systems** Steven J.
