### **Reducing Fuel Consumption and Greenhouse Gas Emissions of Medium- and Heavy-Duty Vehicles, Phase Two**

National Academies of Sciences, Engineering, and Medicine, Transportation Research Board, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on Assessment of Technologies and Approaches for Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles, Phase Two, 2020-06-15 Medium and heavy duty trucks, motor coaches, and transit buses collectively medium and heavy duty vehicles or MHDVs are used in every sector of the economy. The fuel consumption and greenhouse gas emissions of MHDVs have become a focus of legislative and regulatory action in the past few years. This study is a follow on to the National Research Council's 2010 report *Technologies and Approaches to Reducing the Fuel Consumption of Medium and Heavy Duty Vehicles*. That report provided a series of findings and recommendations on the development of regulations for reducing fuel consumption of MHDVs. On September 15, 2011, NHTSA and EPA finalized joint Phase I rules to establish a comprehensive Heavy Duty National Program to reduce greenhouse gas emissions and fuel consumption for on-road medium and heavy duty vehicles. As NHTSA and EPA began working on a second round of standards, the National Academies issued another report *Reducing the Fuel Consumption and Greenhouse Gas Emissions of Medium and Heavy Duty Vehicles Phase Two First Report*, providing recommendations for the Phase II standards. This third and final report focuses on a possible third phase of regulations to be promulgated by these agencies in the next decade.

*Journal of the Physical Society of Japan*, 2017 *Let There Be Light!* Robert S.

Dutch, 2017-06-16 Have you ever wondered what it is like to work on a nuclear power plant? Robert Dutch worked in the UK's nuclear industry for many years as a scientist and then as a tutor at a nuclear training center. He also holds degrees in theology. Drawing upon his qualifications and experience, Robert addresses the controversial issue of nuclear power from a Christian perspective. In contrast to a negative nuclear narrative often portrayed, he presents a positive nuclear narrative alongside other ways of generating electricity. Be prepared to be challenged to think seriously about nuclear's merits in providing clean, low-carbon electricity.

*Sustaining Human Progress* Khalid Malik, 2014 Most people in most countries have been steadily better in human development. Advances in technology and incomes hold ever greater promise for longer, healthier, more secure lives.

### **Resources Management: Discourses, Concepts and Examples**

Janos J. Bogardi, Joyeeta Gupta, K. D. Wasantha Nandalal, Léna Salamé, Ronald R.P. van Nooijen, Navneet Kumar, Tawatchai Tingsanchali, Anik Bhaduri, Alla G. Kolechkina, 2021-06-12 This book provides an overview of facts, theories, and methods from hydrology, geology, geophysics, law, ethics, economics, ecology, engineering, sociology, diplomacy, and many other disciplines with relevance for concepts and practice of water resources management. It provides comprehensive but also critical reading material for all communities.

involved in the ongoing water discourses and debates The book refers to case studies in the form of boxes sections or as entire chapters They illustrate success stories but also lessons to be remembered to avoid repeating the same mistakes Based on consolidated state of the art knowledge it has been conceived and written to attract a multidisciplinary audience The aim of this handbook is to facilitate understanding between the participants of the international water discourse and multi level decision making processes Knowing more about water but also about concepts methods and aspirations of different professional disciplinary communities and stakeholders professionalizes the debate and enhances the decision making

**International Climate Change Law** Daniel Bodansky,Jutta Brunnée,Lavanya Rajamani,2017-06-08 This textbook by three experts in the field provides a comprehensive overview of international climate change law Climate change is one of the fundamental challenges facing the world today and is the cause of significant international concern In response states have created an international climate regime The treaties that comprise the regime the 1992 United Nations Framework Convention on Climate Change the 1997 Kyoto Protocol and the 2015 Paris Agreement establish a system of governance to address climate change and its impacts This book provides a clear analytical guide to the climate regime as well as other relevant international legal rules The book begins by locating international climate change law within the broader context of international law and international environmental law It considers the evolution of the international climate change regime and the process of law making that has led to it It examines the key provisions of the Framework Convention the Kyoto Protocol and the Paris Agreement It analyses the principles and obligations that underpin the climate regime as well as the elaborate institutional and governance architecture that has been created at successive international conferences to develop commitments and promote transparency and compliance The final two chapters address the polycentric nature of international climate change law as well as the intersections of international climate change law with other areas of international regulation This book is an essential introduction to international climate change law for students scholars and negotiators

**Insurance, Climate Change and the Law** Franziska Arnold-Dwyer,2024-04-03 The insurance industry has found itself at the front line of climate change challenges providing insurance cover in relation to risks associated with climate change As risk carriers insurers pay claims for climate change related losses such as property damage caused by windstorms flooding and wildfires which have been increasing in frequency and severity As major institutional investors insurance companies invest in assets that may be increasingly vulnerable to climate risks Insurance regulators across the globe have therefore started to require insurance companies to identify manage and report on climate change risks that could pose a threat to

their financial stability However managing and reporting on the effect of climate risk on an insurer's balance sheet is an inward looking perspective that does not stem climate change It needs to be paired with an outward looking perspective that takes account of the insurance industry's impact on the environment and the insurance industry's capacity to influence what policyholders investee enterprises and other business partners do to address climate change challenges For the insurance industry the key components of positive outward impact are impact underwriting and impact investment This book sets out the current legal and regulatory landscape for impact underwriting and impact investment Whilst the focus of research and regulatory interventions to date has been on inward impact in this book it will be argued that to take positive climate action that supports the Paris Agreement goals and the national and international Net Zero targets the debate should now move on to considering the positive outward impact the insurance industry can make and how we can create a legal environment to facilitate this The book puts forward the case for a new vision of the role of the insurance industry as climate action enablers and makes proposals for insurance products and risk transfer and loss resilience structures that can support policyholders in their transition to a Net Zero economy The audience for this book will include legal practitioners insurance industry professionals financial and insurance regulators policymakers and interested academics Johnson's New Universal Cyclopaedia: a Scientific and Popular Treasury of Useful Knowledge ,1879 Nature Conservation National Strategic Framework for Sustainable Development ,2015-2030 ,2015 Physics Briefs ,1989
