Engineering ,1990 *The Law of Occupation* Yutaka Arai,2009 This monograph analyses the historical evolution of the laws
of occupation as a special branch of international humanitarian law IHL focusing on the extent to which this body of law has
been transformed by its interaction with the development of international human rights law It argues that a large part of the
laws of occupation has proved to be malleable while being able to accommodate changing demands of civilians and any other
persons affected by occupation in modern context Its examinations have drawn much on archival research into the drafting
documents of the instruments of IHL including the aborted Brussels Declaration 1874 the 1899 1907 Hague Regulations the
1949 Geneva Conventions and the 1977 Additional Protocol I After assessing the complementary relationship between
international human rights law and the laws of occupation the book examines how to provide a coherent explanation for an
emerging framework on the rights of individual persons affected by occupation It engages in a theoretical appraisal of the
role of customary IHL and the Martens clause in building up such a normative framework Environmental Control in
Petroleum Engineering DR. John C. Reis Ph.D.,1996-04-25 The petroleum industry must minimize the environmental impact
of its various operations This extensively researched book assembles a tremendous amount of practical information to help
reduce and control the environmental consequences of producing and processing petroleum and natural gas The best way to
treat pollution is not to create it in the first place This book shows you how to plan and manage production activities to
minimize and even eliminate some environmental problems without severely disrupting operations It focuses on ways to treat
drilling and production wastes to reduce toxicity and or volume before their ultimate disposal You ll also find methods for
safely transporting toxic materials from the upstream petroleum industry away from their release sites For those sites
already contaminated with petroleum wastes this book reviews the remedial technologies available Other topics include
United States federal environmental regulations sensitive habitats major U S chemical waste exchanges and offshore
releases of oil Environmental Control in Petroleum Engineering is essential for industry personnel with little or no training in
environmental issues as well as petroleum engineering students **Nayā sāhitya** ,1996 **Catalog of Copyright Entries**
