## **A Practical Guide To Localization:**

A Practical Guide to Localization Bert Esselink, 2000 Translation technology has evolved quickly with a large number of translation tools available. In this revised addition much content has been added about translating and engineering HTML and XML documents, multilingual web sites and HTML based online help systems. Other major changes include the addition of chapters on internationalization, software quality assurance, desktop publishing and localization support. There is a focus on translators who want to learn about localization and translation technology. A Practical Guide to Localization Bert

Esselink, 2000-09-15 A Practical Guide to Localization was written for technical translators, localization engineers, testing engineers, desktop publishers, project managers and anyone else who may be involved in the release of multilingual products. In this second edition translators can learn more about localizing software, online help and documentation files and the latest translation technology tools. Localization engineers can learn all about developing engineering and testing multilingual software and online help projects. For project managers there is all the information needed for planning translation and localization projects, finding resources and ensuring product quality. New to this second fully updated and revised edition are chapters on internationalization, multilingual desktop publishing and software quality assurance. The book has been designed both as a reference work and a teaching tool. Visit the [www.locguide.com](http://www.locguide.com) web site for additions and updates to the book as well as references and links relevant to technical translation and localization. The web site also contains extracts from the book, reviews and ordering information. Bert Esselink has been active in localization for over a decade. After graduating in technical translation and taking university classes in programming and computational linguistics, he worked for several years as software localizer, localization engineer and technical project manager at International Software Products. In 1996 he joined ALPNET in Amsterdam as localization manager, before taking on the role of globalization manager, developing internal production quality standards. In January 2000 Bert joined Lionbridge to head up their European globalization consulting services.
