Parallel Computation Models Xian-He Sun,1990 Lectures in Parallel Computation Alan Gibbons,Paul Spirakis,1993-03-18

The foundations of parallel computation especially the efficiency of computation are the concern of this book Distinguished international researchers have contributed fifteen chapters which together form a coherent stream taking the reader who has little prior knowledge of the field to a position of being familiar with leading edge issues The book may also function as a source of teaching material and reference for researchers The first part is devoted to the Parallel Random Access Machine P RAM model of parallel computation The initial chapters justify and define the model which is then used for the development of algorithm design in a variety of application areas such as deterministic algorithms randomisation and algorithm resilience The second part deals with distributed memory models of computation The question of efficiently implementing P RAM

algorithms within these models is addressed as are the immensely interesting prospects for general purpose parallel computation **Conference Publication** ,1991 Configurable Computing ,1998 This collection of papers presented at the IS T SPIE Electronic Imaging Symposium includes articles on a variety of relevant issues and topics *Algorithm Design and Applications Wiley E-Text Reg Card* Michael T.
