Serious Games and Edutainment Applications

Minhua Ma, Andreas Oikonomou, Lakhmi C. Jain, 2011-12-10 The recent re emergence of serious games as a branch of video games and as a promising frontier of education has introduced the concept of games designed for a serious purpose other than pure entertainment To date the major applications of serious games include education and

training engineering medicine and healthcare military applications city planning production crisis response to name just a few If utilised alongside or combined with conventional training and educational approaches serious games could provide a more powerful means of knowledge transfer in almost every application domain Serious Games and Edutainment

Applications offers an insightful introduction to the development and applications of games technologies in educational settings It includes cutting edge academic research and industry updates that will inform readers of current and future advances in the area The book is suitable for both researchers and educators who are interested in using games for educational purposes as well as game professionals requiring a thorough understanding of issues involved in the application of video games technology into educational settings It is also applicable to programmers game artists and management contemplating or involved in the development of serious games for educational or training purposes

Multi-Agent Based

Simulation XVII Luis Gustavo Nardin,Luis Antunes,2017-10-03 This book constitutes the thoroughly refereed post conference proceedings of the 17th International Workshop on Multi Agent Based Simulation MABs 2016 held in Singapore in May 2016 The workshop was held in Conjunction with the 15th International Conference on Autonomous Agents and Multi Agent Systems AAMAS 2016 The 10 revised full papers included in this volume were carefully selected from 15 submissions The topic of the papers is about modeling and analyzing multi agent systems and applying agent based simulation techniques to real world problems focusing on the confluence of socio technical natural sciences and multi agents systems with a strong application empirical vein Special emphasis is given on exploratory agent based simulation as a principled way of undertaking scientific research in the social sciences and on using social theories as an inspiration to new frameworks and developments in multi agent systems
