## **Application Engine Call A Crystal Report:**

PeopleSoft for the Oracle DBA David Kurtz, 2012-03-02 PeopleSoft for the Oracle DBA Second Edition stands on the boundary between the PeopleSoft application and the Oracle database This new edition of David Kurtz's book is freshly revised showing how to tame the beast and manage Oracle successfully in a PeopleSoft environment You'll learn about PeopleSoft's Internet architecture and its use of Oracle's Tuxedo Application Server You'll find full coverage of key database issues such as indexing connectivity and tablespace usage as they apply to PeopleSoft Kurtz also provides some of the best advice and information to be found anywhere on managing and troubleshooting performance issues in a PeopleSoft environment The solid coverage of performance troubleshooting is enough by itself to make PeopleSoft for the Oracle DBA a must have book for any Oracle Database administrator working in support of a PeopleSoft environment Explains PeopleSoft's technical architecture as it relates to Oracle Database Demonstrates how to instrument and measure the performance of PeopleSoft Provides techniques to troubleshoot and resolve performance problems *Dr. Dobb's Journal of Software Tools for the Professional Programmer*, 1995 Crystal Reports .NET Programming Brian Bischof, 2004 I wrote this book from the perspective of a programmer wanting to learn how to integrate reports within a .NET application I've been working with Crystal Reports since Visual Basic 3 and it's always been difficult to find technical information on report writing I spent a year and a half researching what .NET programmers need to successfully create implement and deploy a Crystal Reports application I even put the book on the internet for everyone to read for free all of last year This generated an incredible number of emails from programmers telling me what they liked disliked and what was missing from the book I learned that there are two distinct types of .NET programmers using Crystal Reports The first type of programmer doesn't have much experience with Crystal Reports and wants a series of tutorials to help them build reports from scratch For this programmer I wrote 13 chapters which teach you everything about adding reports to ASP .NET and Windows applications It starts with the basics of building reports to adding charts crosstab reports sorting and grouping subreports and using the formula editor with Basic syntax and Crystal syntax The second type of programmer has been using Crystal Reports for years and is mostly concerned with how to do technical runtime customization of reports For this programmer I researched and diagrammed the undocumented report object models I included dozens of examples in both VB .NET and C# to show you how to modify reports manipulate different data sources XML ADO .NET ODBC OLE DB stored procedures with parameters modify formulas and report parameters and integrate .NET with the RAS and RDC The dozens of emails I received when the book was online were instrumental for doing a major revision of many chapters before publishing the book in hardcopy format Since releasing the book I continue to receive more emails from people They regret that the free book isn't online anymore but understand that it couldn't last forever and that the hardcopy version is even better I hope you like it and that it helps you achieve your reporting goals September 2004 Update Due to high demand I did a second printing of the book I took advantage of this

opportunity to go through the book and remove all grammatical errors The content is the same but the typos have been corrected
