Compensation Schemes for Damages Caused by Healthcare and Alternatives to Court Proceedings Dobrochna Bach-Golecka, 2021-05-16 The book discusses compensation mechanisms and other non judicial means that offer alternatives to court proceedings designed and provided for within national legal regimes Such schemes are primarily of a civil or administrative character and are mainly intended to supplement criminal liability for medical negligence As such the book focuses on medical malpractice and prospective medical harm from a civil law perspective It examines the contemporary perspective of a patient physician relationship which has evolved from a relation of a quasi patrimonial character into a partnership of quasi equal parties dealing with a medical treatment procedure as a scientific endeavor It also reviews the extra legal conditions that are taken into account in compensation arrangements particularly the need to satisfy a psychological urge for conciliation and empathy on the part of medical personnel Lastly the book explores the responsibility of public authorities and healthcare providers to guarantee access to healthcare that is of a sufficient quality based upon standards provided for in international and European law The Report: Dubai 2020 Oliver Cornock, Although Dubai has traversed some challenging economic territory over recent years the economic stimulus of Expo 2020 preparation and more stable oil prices have eased this strain in 2019 and business sentiment has improved accordingly With the long anticipated expo event set to take place in 2020 attention has started to focus on the important question of sustaining the current economic momentum over the medium term **Ownership and Governance of Companies** Jonathan Michie, Vishnu Padayachee, 2021-06-29 Apartheid South Africa was often thought to run in the interests of the business elite Yet 27 years after apartheid those business interests remain largely entrenched Why Did the South African business community play a role in engineering this outcome perhaps recognising the apartheid era was over and jumping ship in time Conversely the mission of the ANC was widely perceived to be to shift wealth and power into the hands of the whole community Yet despite black empowerment measures corporate ownership remains largely in white hands and certainly in the hands of an elite few even though no longer restricted to whites This picture is replicated across the global south where corporate ownership tends to be concentrated in the hands of an elite rather than being more democratically spread Why have alternative corporate forms not been pursued more vigorously with ownership in the hands of customers employees and local communities In the case of South Africa where the majority of customers and employees are black this could have delivered on the ANC s mission to replace the apartheid era with a democratic one in terms of wealth incomes and power as well as in terms of voting and civic rights This edited volume explores all these questions and looks at ways to align corporate forms with economic and social goals The chapters in this book were originally published as special issues of International Review of Applied Economics World Antimicrobial Awareness Week Vera Manageiro, Marwan Osman, Issmat I. Kassem, Dalal Hammoudi Halat, 2025-01-21 World Antimicrobial Week was established at the 68th World Health Assembly in 2015 and it

takes place from the 18th to the 24th of November every year Its key aim is to improve the awareness of antimicrobial resistance highlighting the importance of education and communication Antimicrobial resistance is caused by bacteria viruses fungi and parasites not responding to current medicines such as antibiotics antivirals antifungals and antiparasitics leading to a higher risk of severe illness and death This has a huge economic impact leading to around five million deaths yearly increased health expenditure and ultimately inequalities Several causes lead to antimicrobial resistance varying from region to region These include the misdiagnosis of certain diseases with the consequent misuse of antimicrobials the overuse of antimicrobials in humans animals and crops or the lack of hygiene sanitation and access to water Due to these different causes antimicrobial resistance needs a multisectoral response focusing on the specific circumstances of each country and region
