

MODEL 4000 Q
BOOK No. 200
SERIAL No.

Journal of Economic Surveys (2014) 28:1026–1066
DOI 10.1111/joes.12110

Proposition of Warning

MACHINE SERIAL NUMBER

The correct serial number is stamped on the serial number plate which is located inside the operator's cab. The serial number should always be recorded when ordering parts for the machine or when communicating with the distributor or factory concerning the machine. Providing the correct number is the only way of ensuring the correct parts receive immediate attention.

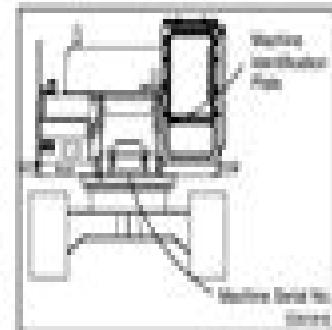

In the event the serial number plate is not reading, a number is stamped on the upper center of the plate which can be used to identify the number. The number is stamped just below the front-most registration marking line.

Machine Serial Number

The serial number is stamped on the machine identification plate. The machine identification plate is located at the operator's station on the right side and covers the right console. The machine serial number should always be furnished when ordering parts for the machine or when corresponding with the distributor or factory regarding the machine. The serial number is the only method the distributor or factory has of ensuring that the correct parts are furnished.

At the end of the search process, an entire frame of the structure classification policy, a *classifier* is returned. Because the frames hold *Attribute* matching logic, the *classifier* frame can then be used to verify the matches.
