Lewis Hirsch,Arthur Goodman,2002 Helping students grasp the why of algebra through patient explanations Hirsch and

Goodman gradually build students confidence without sacrificing rigor To help students move beyond the how of algebra

computational proficiency to the why conceptual understanding the authors introduce topics at an elementary level and

return to them at increasing levels of complexity Their gradual introduction of concepts rules and definitions through a

wealth of illustrative examples both numerical and algebraic helps students compare and contrast related ideas and

Forecast of Its Future This is a personal and insightful book about one of the most important questions of our time how will

journalism make the transition to the digital age Steve Shepard made that leap bravely when he went from being a great

magazine editor to the first dean of the City University of New York journalism school His tale is filled with great lessons for

us all Walter Isaacson bestselling author of Steve Jobs An insightful and convivial account of a bright bountiful life dedicated

to words information and wonder Kirkus Reviews Starred Review This is two compelling books in one Shepard's story of his

life in print journalism and a clearheaded look at the way journalism is evolving due to electronic media social networking

and the ability of anyone with a computer and an opinion to make him or herself heard Booklist Shepard's book will resonate

with many and should be read by anyone interested in the flow of information today and its impact on society as a whole

Library Journal The book is in part a memoir a tale of a life lived at the height of print journalism when print journalism itself

was at its height But it is also an analysis an examination of the new challenges facing an old industry as it ambles and

occasionally sprints its way into the digital age The Washington Post About the Book My personal passage is in many ways a

microcosm of the larger struggle within the journalism profession to come to terms with the digital reckoning Will the new

technologies enhance journalism or water it down for audiences with diminished attention spans What new business models will emerge to sustain quality journalism Stephen B Shepard has seen it all Editor in chief of BusinessWeek for more than 20 years Shepard helped transform the magazine into one of the most respected voices of its time But after his departure he saw it collapse another victim of the digital age In Deadlines and Disruption Shepard recounts his five decades in journalism a time of radical transformations in the way news is developed delivered and consumed Raised in the Bronx Shepard graduated from City College and Columbia joined BusinessWeek as a reporter and rose to the top editorial post He has closed the circle by returning to the university that spawned him founding the Graduate School of Journalism at the City University of New York In the digital age anyone can be a journalist Opinion pieces are replacing original reporting as the coin of the realm And an entire generation is relying on Facebook friends and Twitter feeds to tell them what to read Is this the beginning of an irreversible slide into third rate journalism Or the start of a better world of interactive multimedia journalism Will the news industry live up to its responsibility to forge a well informed public Shepard tackles all the tough questions facing journalists the news industry and indeed anyone who understands the importance of a well informed public in a healthy democracy The story of Shepard s career is the story of the news industry and in Deadlines and Disruption he provides peerless insight into one of the most critical issues of our time
