Meteorology Today First Canadian Edition:

Marine Fog: Challenges and Advancements in Observations, Modeling, and Forecasting Darko Koračin, Clive E. Dorman, 2017-01-28 This volume presents the history of marine fog research and applications and discusses the physical processes leading to fog's formation, evolution and dissipation. A special emphasis is on the challenges and advancements of fog observation and modeling as well as on efforts toward operational fog forecasting and linkages and feedbacks between marine fog and the environment.

Meteorology Today C. Donald Ahrens, Peter Lawrence Jackson, Christine E. O. Jackson, 2012 Meteorology Today 1st Canadian edition is the first textbook of its type written specifically with the needs of the Canadian market and its unique meteorological environment in mind. This first Canadian edition builds upon the tried and tested strengths of the Ahrens Meteorology series and provides a more relevant resource for Canadian students and instructors by ensuring that Canadian content, practices, conventions and examples are used throughout. An Earth Systems feature, the first of its kind in Ahrens, has been developed for this edition, presenting the interconnectedness of elements and providing a peek at the chapter content. This visual table of contents highlights the Earth system components reflected in each chapter: the atmosphere, hydrosphere, cryosphere, lithosphere, biosphere and anthrosphere. The relationships between the chapter's content and Earth systems are further expanded upon in the introduction of each chapter.

It will ensure that you not only understand what causes changes in the weather on a local, national and global scale but that you can also fully interpret weather broadcasts and are able to make your own predictions. Packed full of case studies, this book will explain both the weather we experience daily: winds, cold fronts, rain and shine and the extreme weather that makes the headlines all too often: El Niño, Hurricane Katrina, floods. It will also focus on climate change and its effects: how will our weather be different in the future?
