The Power of Thanks: How Social Recognition Empowers Employees and Creates a Best Place to Work

Eric Mosley,Derek Irvine,2014-12-12 The most powerful word in your leadership vocabulary is THANKS Building a fully engaged energized workforce is the key to business success The Power of Thanks reveals how leading companies like Intuit JetBlue Airways IHG Symantec ConAgra Foods and The Hershey Company empower employees through social recognition in which the practice of mutual appreciation and trust directs and rewards higher performance Eric Mosley and Derek Irvine executives at the world renowned employee recognition firm Globoforce explain why social recognition is so powerful and how you can apply it in your company Case by case they show how a carefullyplanned and consistently executed Culture of Recognition business

strategy inspires Greater employee engagement and loyalty Stronger more unified teams and departments A creative innovative company culture Improved customer satisfaction Increased profitability and organizational health Mosley and Irvine provide practical advice and proven examples for devising a powerful growth generating strategy that modernizes employee recognition for today s social global multi generational and 24x7 wired workforce When employees participate in a culture that makes everyone a stakeholder in the organization s success positive energy spreads like wildfire and business results follow Something so simple and powerful might work like magic but it s really just common sense It s smart management It s long term thinking It s The Power of Thanks *Leading for Learning* Lisa Koss,2020-10-08 People do their best work when they are motivated This may sound obvious but while people managers instinctively agree with the centrality of motivation at work and its impact on employee engagement their practices do not follow With so much real work to do every day how can managers also carve out time to learn engage build relationships tap motivation encourage development and inspire The problem is a false dichotomy between the world of business and that of people development What if managers were able to systematically transform everyday business issues into meaningful developmental coaching opportunities with employees at the same time This proven coaching approach radically shifts conversations away from either or propositions and uses an entirely different lens transforming business challenges by connecting them directly to employee motivation to achieve the desired business result while dramatically increasing employee engagement And all this comes none too soon as leaders must rethink the way they lead given the modern realities of organizational life Among them A rapidly changing workplace and increasing uncertainty that requires a fundamental shift in the leader s approach including the distribution of authority and the expectation that employees take responsibility for their own learning Pervasive and persistent employee disengagement characterized by employees who no longer accept the organization s priorities at the expense of their own where organizations that continue to dictate terms will find ongoing challenges with costly employee turnover and lack of engagement During the past decade the Developmental Coaching Model has been taught across the globe in nine languages and has been enthusiastically embraced by thousands of managers while dissolving the invisible barriers that block individual and organizational development and business success *Annual Report and Directory* Conference Board,2008
