Digital Technologies in Teaching and Learning Strategies Alexandr Lyapin, Olga Kalinina, 2022-05-03

This book demonstrates the benefits and drawbacks of using digital technology in preparing online lessons and educational activities. The experience of the last year has shown that online education is becoming a priority. This gave impetus to the creation and development of a new generation of equipment for online education. The book presents latest innovative technologies and modern digital trends in the field of information and communication technology for online education including personalized learning, neuro information systems, mobile learning, development of software and hardware infrastructure and the use of robotics technologies. Key technologies for managing risk and cybersecurity such as cloud and data security, identity and trust, convolution systems, computational intelligence and cryptography techniques, malware and attack analysis are presented. The topic of cybersecurity is one of the most important issues in the modern digital world. The results of the research on recently developed software, decision support systems and cloud technologies make a huge contribution to the development of information technology in the context of digitalization. This book is of interest for developers of applications and programs for online education for software and hardware suppliers who want to keep up with the times and reorient existing IT systems for use in online education.
