AN AMSCO PUBLICATION

We want to use construction to create two parallel lines. To do this, we start by constructing two perpendicular lines.

1. Start with a perpendicular line. Follow the same steps as shown above.

2. Construct another perpendicular line. Line is parallel to original line.

Finally, we construct a parallel line through a point, C.

3. Connect point C and line using straightedge. Line intersects at D.

4. Create two arcs. Set compass width greater than distance between points C and D, but smaller than the distance between C and P. Draw arcs with compass placed at C and D.
