

Analyze

1. See Data Table.
2. See Data Table.
3. See Data Table. Sample Calculation for Pluto: $e = 4/16 = 0.25$
4. See Data Table.
5. Both foci are at the center.
6. It is very close to being a circle.
7. The comet. It looks more flattened out than the other orbits.

Conclude and Apply

1. Yes, the planets and comet travel in elliptical orbits.
2. Since the eccentricity of Earth is so small, Kepler might not have concluded that planets have elliptical orbits.
3. It travels fastest at perihelion. According to Kepler's second law, equal areas are swept out in equal time. Since there is less area available at perihelion, the planet must move faster.
4. $\frac{v_P}{v_A} = \frac{A}{P} = \frac{10.0}{6.0} = \frac{1.7}{1}$
5. $v_A = \text{minimum velocity}$
 $= 3.7 \text{ km/s}$
 $v_P = 1.7 \times v_A$
 $= 1.7 \times 3.7 \text{ km/s}$
 $= 6.3 \text{ km/s}$

Going Further

1. Collect data using dates of location of a planet. Use areas and dates to confirm the second law.
2. In order to show the third law, a computer model would have a planet actually moving so that periods and distances could be measured.

Real-World Physics

Students can research elliptical orbits of satellites. Encourage the students to pick one or two satellites and, if possible, plot orbit data to determine the path that each satellite takes.

Answers To Problems In Physics Principles Problems:

Problems and Solutions on Quantum Mechanics Yung-Kuo Lim, 1998 The material for these volumes has been selected from 20 years of examination questions for graduate students at the University of California at Berkeley Columbia University University of Chicago MIT SUNY at Buffalo Princeton University and the University of Solutions of Weekly Problem Papers John James Milne, 1885 **Study Guide to Accompany Physics : Principles and Insights** Ira Maximilian Freeman, 1968 **Artificial Intelligence in Education** R. Luckin, K.R. Koedinger, J. Greer, 2007-06-29 The nature of technology has changed since Artificial Intelligence in Education AIED was conceptualised as a research community and Interactive Learning Environments were initially developed Technology is smaller more mobile networked pervasive and often ubiquitous as well as being provided by the standard desktop PC This creates the potential for technology supported learning wherever and whenever learners need and want it However in order to take advantage of this potential for greater flexibility we need to understand and model learners and the contexts with which they interact in a manner that enables us to design deploy and evaluate technology to most effectively support learning across multiple locations subjects and times The AIED community has much to contribute to this endeavour This publication contains papers posters and tutorials from the 2007 Artificial Intelligence in Education conference in Los Angeles CA USA **Weekly problem papers, with notes. [With] Solutions** John James Milne, 1885 **Chatgpt and Other Generative AI Tools** Jochen Kuhn, Stefan Küchemann, Knut Neumann, Martina Rau, 2025-02-17 In the past ten years applications of generative artificial intelligence GAI have found rapidly growing use in medicine science and daily life Large language models LLMs opened up new avenues in particular for education LLMs have been used to create interactive educational content for students stimulate their curiosity generate code explanations and develop assessment questions Additionally LLMs been applied for language practice anxiety alleviation and feedback provision In higher education LLMs have shown potential for assisting in medical exam preparation and clinical decision making In school education LLMs can help teachers with automated evaluation of student responses and respective adaptive feedback More recently LLM based applications such as chatGPT have been used to generate teaching materials or assessment tasks across different subjects The fields understanding of the effects of the use of LLM based applications in classroom teaching however is still in its infancy GAI tools may help solving a range of tasks in education in particular with respect to teachers and students and teachers efforts to generate content However it is critical that teachers and students do not overly rely on GAI generated solutions but instead critically assess each solution Students should furthermore not use GAI tools to avoid investing relevant mental effort to create mental models or more broadly build up competencies Problems for Physics Students K. F. Riley, 1982-11-25 This book is a collection of some 400 physics problems with hints on their solutions and answers The physics covered encompasses all areas studies by final year advanced level students in schools and high schools The author has concentrated on presenting interesting and to some

extent unusual problems which can be solved using the physical principles normally taught in advanced school courses By working through the questions the student will become adept at selecting and applying physical principles appropriate to any particular problem Problems for Physics Students will provide stimulation and practical help not only for those preparing for pre university examinations in physics but also for first year physics and engineering students studying at universities and other institutions offering first degree courses Teachers of physics will find this an invaluable sourcebook for ideas to generate discussion and for unusual problems to stimulate interest
