specifically designed to identify and verify new trends in drug use Part IV on risk behaviour demonstrates how qualitative research methods have made a considerable contribution to the knowledge and understanding of health risks associated with drug injecting Subsequent sections consider the theme of social exclusion drug markets and drug services evaluation The final section is given over to qualitative research on drug use within a global research agenda It reveals the scale of qualitative drug research varies greatly between countries that little is published in the drug specific scientific journals and that high quality work often appears to fail to influence policy The monograph concludes that a comprehensive approach should include the training of individual experts and research teams and exchanges of experience between researchers across and beyond Europe
