Education for people and the planet: Creating sustainable futures for all UNESCO,2016-09-12 This edition of the Global Education Monitoring Report GEM Report is the first in a series that will assess the progress of education under the new Sustainable Development Goals SDGs *Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)* Union of International Associations,2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events Women's Work Jennifer Moore,2025-03-11 When women have full socioeconomic citizenship as well as equitable and respectful partnerships with men transformative justice can be sustained in postconflict societies In Women s Work Jennifer Moore presents a reimagined theory of peacebuilding and transformative justice based on the experiences and insights of women farmers and microentrepreneurs who lived through protracted civil conflicts drawing on seven years of interviews with women activists across ten communities five in the Acholi region of Northern Uganda and five in the Moyamba and Koinadugu Districts of Sierra Leone Despite the important differences between the preconflict and conflict histories and demographics of the two countries Moore finds commonalities in the practical yet visionary approaches to community life emerging from the core values daily activities and long range goals shared by rural cooperative members in both regions Collective survival communal healing and conflict resolution define the rhythm of these women s daily lives as they go about building peace piecemeal They reject punitive retribution models and demand instead a peacebuilding model that advocates for advances in material well being the acknowledgment of state accountability for community suffering and reconciliation and restoration of community networks But most important Moore amplifies these women s voices when they insist that legal equality for women and healthy partnerships between women and men are also essential components to enduring transformation of their societies Moore theorizes what peacebuilding look like if it were modeled on these women led matriarchally structured communities that proved not only to be effective at holding governments accountable but also to have the capacity to feed their people and revitalize their local economies Women s Work shows that when women have full socioeconomic citizenship as well as equitable and respectful partnerships with men transformative justice can be sustained through the arts of collective livelihood violence free conflict management and celebration *National Journal* ,2000 A History of Competitive Gaming Lu Zhouxiang,2022-05-12 Competitive gaming or esports referring to competitive tournaments of video games among both casual gamers and professional players began in the early 1970s with small competitions like the one held at Stanford University in October 1972 where some 20 researchers and students attended By 2022 the estimated revenue of the global esports industry is in excess of 947 million with over 200 million viewers worldwide Regardless of views held about competitive gaming esports have become a modern economic and cultural phenomenon This book studies the full history of competitive gaming from the 1970s to the 2010s against the background of the arrival of the electronic and computer age It investigates how competitive gaming has grown

into a new form of entertainment a sport like competition a lucrative business and a unique cultural sensation It also explores the role of competitive gaming in the development of the video game industry making a distinctive contribution to our knowledge and understanding of the history of video games A History of Competitive Gaming will appeal to all those interested in the business and culture of gaming as well as those studying modern technological culture **Just Security in an Undergoverned World** William Durch,Joris Larik,Richard Ponzio,2018-01-19 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of wealthier lands whose people in turn draw into themselves Humanity's very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity's future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of individual actors It offers just security as a new framework for charting innovative solutions and strategies for effective and essential global governance
