**The Data Scientist. A cuckoo in the Management Accountant's nest?** Christoph Beis,Andreas Friedrich,2022-09-01  
Master s Thesis from the year 2019 in the subject Business economics Business Management Corporate Governance grade 5  
0 Stockholm School of Economics language English abstract Data Science has been one of the most used buzzwords on  
corporate agendas in recent years and with it a new professional the data scientist has entered the organizational stage  
Surprisingly Management Accounting literature has not investigated the role of data scientists and their interactions with  
management accountants so far Via a qualitative case study we strive to establish a more nuanced and clearer understanding  
of the concrete tasks carried out by these organizational players and shed light on the interactions with management  
accountants In this paper chapter 2 presents MA frameworks that combine both the IIS and the MA domains We further give  
an overview of tasks that have been historically attributed to management accountants Subsequently these tasks are  
contrasted to those ascribed to the new professional actor i e the data scientist In this context we present the research  
questions of this paper that aim at closing significant research gaps in this area Afterwards method theories are introduced  
that enable the creation of a theoretical framework Within chapter 3 the research method and case background are  
presented so that the research questions can be analyzed in chapter 4 and afterwards discussed in chapter 5 Moreover in  
this section a general outlook for the MA domain is given Finally the limitations of this study are stated and suggestions for  
further research are presented in chapter 6    **Accounting : the Basis for Business Decisions** Robert F. Meigs,Wai P.
