

FRIENDSHIP IN EMERGING ADULTHOOD

compassion and confidence, they also form the most vital source of social support (as cited in Tanner, Arnett & Leis 2009, 49-51). Friendships during emerging adulthood are created due to similarity in age, gender, educational orientation, leisure and media preferences, ethnicity as well as participation in risk behavior. These factors majority influence the role of friendships in the life of emerging adults. Moreover, the difficulty in obtaining financial independence and competing demands during this period has forced them to postpone their age of marriages and parenthood. During this period, when emerging adults are single and lonely, friends become the central part of their lives because they feel they can share everything with their friends; discuss about close intimate relationships with them since friends can understand them very well; can mirror their thoughts and can also provide invaluable advice when needed (Arnett, 2004). The development of friendship during emerging adulthood is not only limited to friendship but extends to areas of work and intimate relationships. Moreover, the psychological adjustment and well-being of young is majority affected by friendship during this phase (Tanner, Arnett & Leis 2009, 51).

According to studies done by Samer (2003), emerging adults mainly seek for loyalty, warmth in friendship and someone with whom they can share their personal tales with and therefore, confide in friends for this purpose. Although the number of friends during emerging adulthood is constant similar to adulthood, the time spent with them is not relatively as high as during adulthood. Friendship during emerging adulthood can be between people of same sex as well as opposite sex. According to research, male emerging adults' favorite pastime is participating in shared activities with their male friends whereas female emerging adults prefer spending most of their time talking. In addition, the conversation of males revolves around sports, work and cars while females generally discuss about themselves, their personal problems
