Educational Assessment in Latin America Sue Swaffield, Sally M Thomas, 2019-07-23 This collection presents educational assessment research from Latin America adding to a relatively small but growing body of research considering educational assessment and evaluation issues in this large region The predominance of Chile reflects its early highly centralized education system and the fact that it adopted national testing before other Latin American countries It was also an early participant in international assessment programmes Other countries have followed the trend of implementing national testing and to a lesser extent participating in international surveys The complementary development of technical expertise in quantitative research methods has enabled extensive analysis of the large data sets generated by these testing and assessment programmes Taken together the evidence reported provides a means not only of reviewing educational quality issues in Latin America but also of facilitating comparisons that allow the context specificity of equivalent research conducted in western developed countries to be considered The chapters in this book were originally published as a special issue of Assessment in Education Principles Policy and Practice      *Teaching Performance Assessments as a Cultural Disruptor in Initial Teacher Education* Claire Wyatt-Smith, Lenore Adie, Joce Nuttall, 2021-08-23 This book explores how well teachers are prepared for professional practice It is an outcome of a large scale research and development program that has collected extensive data on the impact of the Graduate Teacher Performance Assessment on Initial Teacher Education programs and preservice teachers engagement with the assessment It contributes to international debates in teacher education by examining an Australian experience of teacher performance assessments as a catalyst for cultural change and practice reform in teacher education The respective chapters describe and critique this unique multi institutional investigation into the quality of teacher education and present substantial evidence drawing on a variety of conceptual

empirical and methodological entry points Further they address the intellectual experiential and personal resources and related expertise that teacher educators and preservice teachers bring to their practice Taken together they offer readers clearly conceptualised and evidence rich accounts of site specific and cross site investigations into cultural pedagogical and assessment change in Initial Teacher Education *Information Display* ,2008 **Australian Education Index** ,1988
