**Cultural Politics of Targeted Killing** Kyle Grayson, 2016-07-15 The deployment of remotely piloted air platforms RPAs or drones has become a defining feature of contemporary counter insurgency operations Scholarly analysis and public debate has primarily focused on two issues the legality of targeted killing and whether the practice is effective at disrupting insurgency networks and the intensive media and activist scrutiny of the policy processes through which targeted killing decisions have been made While contributing to these ongoing discussions this book aims to determine how targeted killing has become possible in contemporary counter insurgency operations undertaken by liberal regimes Each chapter is oriented around a problematisation that has shaped the cultural politics of the targeted killing assemblage Grayson argues that in order to understand how specific forms of violence become prevalent it is important to determine how problematisations that enable them are shaped by a politico cultural system in which culture operates in conjunction with technological economic governmental and geostrategic elements The book also demonstrates that the actors involved what they may be attempting

to achieve through the deployment of this form of violence how they attempt to achieve it and where they attempt to achieve it are also shaped by culture The book demonstrates how the current social relations prevalent in liberal societies contain the potential for targeted killing as a normal rather than extraordinary practice It will be of great use for academic specialists and graduate students in international studies geography sociology cultural studies and legal studies **The Autocar**,1975

*Policies and Practices for Sustainability Transformation in Higher Education Institutions* Vasiliki Kioupi,Rosario Michel-Villarreal,Felister Nzuve,Naoya Abe,George Giannopoulos,2025-08-07 Calls for transforming higher education toward sustainability by academics are not new Recently students both current and prospective have actively voiced their demands for this change They seek an education that equips them to navigate the complexities of sustainability and climate change fostering knowledge and skills for action In response higher education institutions HEIs are formulating strategies to align their mission with sustainability goals However the effectiveness of these strategies along with the underlying policies and practices remains insufficiently studied To address this gap it is crucial to convene academics professional staff and students for discussions on necessary cultural shifts a roadmap and ways to monitor and evaluate this change Such dialogues will lead to improved decision making for transformation to achieve sustainability Students will not only learn about sustainability in their courses but also apply them to their lives within and beyond universities that champion holistic sustainability
