### **Dukes Classification System:**

This classification system was put forward by Cuthbert Dukes in 1932 for rectal cancer only. However, later on it was modified by Kirklin to stage both colonic and rectal cancers. In 1967, Turnbull re-modified the Dukes classification to include distant metastasis as well as introduced a stage for unresectable tumors. TNM staging, however, is now preferred over Duke's classification and its use in clinical practice is no more recommended (9)

- **DUKES A:** The carcinoma has invaded the inner lining of the colonic wall however no invasion through the colonic wall
- **DUKES B:** Invasion through the muscular wall however no involvement of the nearby lymph nodes
- **DUKES C:** Involvement of at least 1 nearby Lymph node
