- **Abstract** The purpose of this study was to determine the effect of a 12-week resistance training program on the strength and endurance of the lower extremities in healthy young adults. The subjects were 15 male and 15 female college students, aged 18-25 years, who were randomly assigned to either a resistance training group or a control group. The resistance training group performed a 12-week program of resistance training, while the control group performed no exercise. The subjects were tested at baseline and at 12 weeks for strength and endurance. The results showed that the resistance training group had significantly greater strength and endurance than the control group at 12 weeks. The findings suggest that a 12-week resistance training program can improve the strength and endurance of the lower extremities in healthy young adults.

Knowledge Spaces Jean-Claude Falmagne, Dietrich Albert, Christopher Doble, David Eppstein, Xiangen Hu, 2013-06-20 The book describes up to date applications and relevant theoretical results These applications come from various places but the most important one numerically speaking is the internet based educational system ALEKS The ALEKS system is bilingual English Spanish and covers all of mathematics from third grade to the end of high school and chemistry It is also widely used in higher education because US students are often poorly prepared when they reach the university level The chapter by Taagepera and Arasasingham deals with the application of knowledge spaces independent of ALEKS to the teaching of college chemistry The four chapters by Albert and his collaborators strive to give cognitive interpretations to the combinatoric structures obtained and used by the ALEKS system The contribution by Eppstein is technical and develops means of searching the knowledge structure efficiently

Building Learning Experiences in a Changing World Piet Van den Bossche, Wim H. Gijssels, Richard G. Milder, 2011-04-14 *Advances in Business Education Training* is a Book Series to foster advancement in the field of Business Education and Training It serves as an international forum for scholarly and state of the art research and development into all aspects of Business Education and Training This new volume deals with several aspects of the challenge to design learning in and for a changing world The first part concerns program development How to build curricula that are future proof Principles to innovate our curricula are identified It answers the question how we can incorporate the need for change in our thinking

about curriculum development and identify the necessary elements to incorporate in our curricula The second part focuses on the increasing diversity of students and employees within our schools and organizations in terms of culture language and perception of ability gifts and talents This offers a range of opportunities but at the same time can possibly jeopardize some processes that are taken for granted Chapters in this part analyze the processes that play a crucial role in dealing with this diversity and identify educational practices that can help to harvest the potential that lies within this diversity The third part of this book digs further into the possibilities that are opened up by the implementation of ICT support in our learning environments E learning provides tools to adapt these environments to the needs of an increasingly diverse student population In the last part we focus specifically on the workplace and how learning can be designed in such a way that employees are equipped for a shifting workplace On the one hand it is looked how training can affect performance in the workplace Does learning transfer to the work environment On the other hand it is questioned how one can design affordances to trigger learning in the workplace

Journal of Developmental Education ,2010

ANALYSIS OF ALEKS MATHEMATICS PLACEMENT TEST DATA ,2017 Abstract In Fall 2014 Michigan Technological University MTU began using an online mathematics placement test provided by ALEKS Corporation This study answers three questions that accompanied this implementation 1 Do the cut scores being used for Precalculus and Calculus I result in the expected pass rates for those courses 2 Does the path by which a student becomes eligible for Calculus I via a single placement test attempt via multiple placement test attempts or by beginning in Precalculus at MTU influence their likelihood of success in Calculus I and 3 Does a mathematical background weak in any particular curriculum area correlate with a lower chance of success in Calculus I ALEKS placement test scores Calculus I exam scores and Precalculus and Calculus I final grade data from students who took the ALEKS placement test during the 2015 testing cycle were examined A conditional probability analysis indicated that the current cut scores result in a probability of a C grade or better of at least 0.64 in each course examined Tabulation of DFW rates showed that students right at the cut score threshold have higher DFW rates than the overall rate for the course Odds ratios revealed

that students who placed into Calculus I on their first testing attempt were the most likely to receive a final grade of C or better ALEKS subscore data indicated that most incoming students exhibited knowledge gaps in trigonometry Logistic regression showed that a 1% increase in trigonometry subscore increased the odds of earning a C or better in Calculus I by 3%
