

# STAAR REVIEW BUNDLE

**Informational**

Read the following and choose the best answer to each question.

1. Junk Food: “Yucky But Good”

Have you ever noticed that a bag of chips or a candy bar tastes good but isn’t healthy or nutritious at all? Junk food is junk because it has a lot of sugar, salt, and empty calories. But have you ever thought about what junk food does to your body?

2. Junk Food is very bad. It’s high in sugar, salt, or saturated fat. But it’s not the nutrients your body needs. Fast food, soda, chips, and candy are all examples. These foods may give you a quick burst of energy, but they don’t help your body grow strong or stay healthy. Too much junk food can lead to health problems like obesity, diabetes, and heart disease.

3. Overeating with junk food is bad for your body. The sugar and fat in these foods make your brain release chemicals that make you feel happy. These chemicals give you more junk food, even when you’re not hungry! The chemicals in the food make you want more. The more junk food you eat, the harder it is to stop. That’s why it’s important to eat these foods only once in a while.

4. Eating healthy foods instead of junk food gives your body the energy and nutrients it needs. Fruits, vegetables, whole grains, and proteins help you grow, stay healthy, and stay active. The next time you want a snack, think about what you’re eating and how it can help you stay healthy and happy on the long run!
