4th Grade Reading Comprehension Bess Milton, 2003-12-15 *The Solar System*, **The Solar System** Jennifer Lawson, 2001 The 16 lessons in this module introduce students to the solar system through an investigation of the planets and the sun. Students explore the earth-sun relationship in terms of the day-night cycle and the year cycle. As well, students investigate the characteristics of the moon, its phases, and its eclipses. Students also explore gravity and the constellations and the history of space exploration. Also included are materials lists, activity descriptions, questioning techniques, activity centre and extension ideas, assessment suggestions, activity sheets, and visuals. The module offers a detailed introduction to the Hands On Science program, guiding principles, implementation guidelines, an overview of the skills that young students use and develop during scientific inquiry, a list of children's books and websites related to the science topics introduced, and a classroom assessment plan with record-keeping templates.

Handbook of Research on Family Literacy Practices and Home-School Connections Fox, Kathy R., Szech, Laura E., 2022-06-24 Research has shown that families and schools that partner together improve literacy outcomes for their students. Family literacy includes homework and shared book reading but goes beyond these school-to-home activities to encompass family-generated practices. These literacies include family connections around activities such as cooking, play, religion, social, and community groups. Further study on the importance of the partnership between the home and school is required to implement best practices and provide students with the best possible education. The Handbook of Research on Family Literacy Practices and Home School Connections seeks to understand the connections made and new information learned during the COVID-19 pandemic surrounding family literacy and shares updated practices and new perspectives on what it means to partner with families and embrace diverse family literacies in this new world. The book also provides teachers' perspectives on how future relationships between the school and home can be shaped through both narrative and research-based chapters. Covering key topics such as parenting, homework, and social distancing, this major reference work is ideal for administrators, school faculty, academicians, scholars, practitioners, instructors, and students.

Hands-On Science, Level 6 Jennifer Lawson, 2000 This teacher resource offers a detailed introduction to the Hands On Science program which includes its guiding principles, implementation guidelines, an overview of the science skills that grade 6 students use and develop, and a classroom assessment plan complete with record-keeping templates. The guide has four instructional units: Unit 1 Diversity of Living Things, Unit 2 Flight, Unit 3 Electricity, Unit 4 The Solar System. Each unit is divided into lessons that focus on specific curricular outcomes. Each lesson has materials lists, activity descriptions, questioning techniques, activity centre and extension ideas, assessment suggestions, activity sheets, and visuals.

Classroom Instruction that Works Robert J. Marzano, Debra Pickering, Jane E. Pollock, 2001 Describes nine different teaching strategies which have been proven to have positive effects on student learning and explains how those strategies can be incorporated into the classroom.
