Read warnings that occur during machine operation and maintenance are essential to follow to observe best safety rules and procedures. Before operating your machine in performing maintenance, read and become familiar with all the safety precautions and recommendations given in this section. Remember that failure to observe even a single precaution could injure you and the people around the machine in a serious accident.

Following external warnings is vital for preventing accidents. All personnel working with the machine, including the supervisor, machine operator and others, should be familiar to potentially dangerous situations and take the necessary measures to prevent accidents.

Safety precautions and recommendations are outlined in this section and are also included in the operation and maintenance instructions given in subsequent sections. Warning signs are also provided on the machine. The cautionary instructions in this manual are identified as "DANGER", "WARNING", "CAUTION" or "NOTICE". These terms are defined as follows:

DANGER
DANGER indicates an extremely hazardous situation, which, if not avoided, will result in death or serious injury.

WARNING
WARNING indicates a potentially hazardous situation, which, if not avoided, could result in death or serious injury.

CAUTION
CAUTION indicates a potentially hazardous situation, which, if not avoided, may result in a minor or moderate injury.

NOTICE
