## BREAD FOR LIFE

Did you know that bread has been around for more than 30,000 years? It is believed that prehistoric man started cooking a bread like mixture by frying it on stones. Today bread is one of the most popular foods in the world. This is because it provides long lasting energy for the body, is relatively simple to make and is inexpensive to buy. Bread is made from combining water and flour, with yeast being added to make the bread rise when baking. Most breads today contain many extra ingredients, such as grains and nutrients, as well as preservatives to prevent the bread from going stale. Bread is a very important part of our everyday diet as it provides us with the energy, fibre, nutrients and vitamins that we need to grow and repair our body. It is also a major source of carbohydrates. Carbohydrates give our body the energy needed to fuel our brain, kidneys, heart and muscles. Without carbohydrates you wouldn't have enough energy to learn at school, go for a walk with your family or even play on the playground.

**Effective Scoring Rubrics** ,1995      **The Reading Process** Miles V. Zintz,Zelda R. Maggart,1984      **Beyond Standardized Testing** George W. Elford,2002-10-23

Here s a fresh idea from an experienced testing professional that addresses the problem of the overuse of standardized testing Elford argues that so called test based reform has given rise to the cram curriculum and turned schools into test prep centers Overlooked are the classroom teachers who observe the actual work of students and are the primary and richest source of information on learning The author lays out a better approach to accountability using standards teacher judgments and the tools of the information age This is not an attack on standardized testing which supplies the only interpretable information the public has been able to attain Rather it recommends comprehensive computer based systems that link every teacher and classroom into their school district s data warehouse This system supports and utilizes the richest source of accountability information the presently un tapped knowledge in the minds of teachers At the heart of the system are standardized teacher judgments related to content and performance standards and supported by standards based scoring rubrics that are integrated into a computer based instructional management information system Among the advantages the system offers are Students are graded on quality of their work not how they compare with other students The school or school district becomes the primary source of accountability information instead of the state Provides better information for college admissions Provides employers with a record to use that shows the link between school and work The technology for such a system is ready and waiting This book defines the urgent need for a computer based instructional information system to which every teacher is linked and calls upon innovative school leaders to embrace the idea      *Word Expressions*
