

Smart Electronic Transmitters Type BCN

A0580

FIGURE 1 - Type BCN Smart Electronic Pressure Transmitter and Type STT02 Smart Transmitter Terminal

Features

- **Direct Replacement of Existing Two-Wire Transmitters.** The BCN transmitter (point-to-point mode) can replace most 4 to 20 mA output pressure transmitters that currently operate over a conventional two-wire system.
- **Enhanced Remote Communication.** Communication with the BCN transmitter is possible using the Type STT02 Smart Transmitter Terminal. The communication method uses a high frequency alternating current (ac). This technique has been designed to function in the high noise environments found in many plants. The STT02 terminal can be used anywhere the signal lines can be accessed and can be located up to 1 mile (1.6 Km) from the target device, providing maximum remote user flexibility.
- **Simultaneous Digital Communications and Process Variable.** Communication information is modulated and does not effect the 4 to 20 mA process variable signal.
