Adobe Scripting Guide:

Adobe After Effects Scripting Guide Nathan CLARK, 2018-12-07 This Book Is To Learn A script is a series of commands that tells an application to perform a series of operations You can use scripts in most Adobe applications to automate repetitive tasks perform complex calculations and even use some functionality not directly exposed through the graphical user interface For example you can direct After Effects to reorder the layers in a composition find and replace source text in text layers or send an e mail message when rendering is complete Although both the After Effects expressions language and the After Effects ExtendScript scripting language are based on JavaScript the expressions features and scripting features of After Effects are separate and distinct Expressions cannot access information from scripts such as variables and functions Whereas a script tells an application to do something an expression says that a property is something However because the After Effects expression language and ExtendScript are both based on JavaScript familiarity with either one is very helpful in understanding the other The heart of a scriptable application is the object model When you use Adobe After Effects you create projects compositions and render queue items along with all of the elements that they contain footage images solids layers masks effects and properties Each of these items in scripting terms is an object This guide describes the ExtendScript objects that have been defined for After Effects projects **Adobe Acrobat 7 Official**

JavaScript Reference Adobe Systems, Inc., 2005-11-10 Do you spend too much time doing repetitive production tasks such as placing and replacing images resizing them dragging them from one document to another and preparing images for printing instead of being creative Do you use Adobe Acrobat and have a strong working knowledge of JavaScript Then you are in luck Since Adobe Creative Suite 2 was created with built in support for scripting virtually every repetitive or time consuming task that creative professionals have to do in Acrobat can be streamlined or automated with the help of a script This book describes how to use JavaScript to manipulate and extend Adobe Acrobat and provides reference information for the JavaScript objects properties and functions defined by Adobe's applications Now available in print for the first time this book doesn't teach you how to write code in JavaScript but if you are familiar with the scripting language and want to start writing scripts for Acrobat you will appreciate having the most definitive up to date reference available *Real World Adobe InDesign CS2* Olav Martin Kvern, David Blatner, 2006 You've mastered page design and can easily work your Quark magic Now you are ready to take the plunge and switch to Adobe InDesign CS2 and you need to learn and start successfully using the award winning software immediately Real World Adobe InDesign CS2 has all the industrial strength techniques and time saving tips you need to start laying out proofing and printing pages with InDesign CS2 without missing a beat or a deadline You will find everything you need here to master InDesign's advanced page layout tools manage color snippets use the Bridge effectively and more You will also find complete coverage of InDesign CS2's new features Object Styles Photoshop and Adobe PDF layer support using InCopy Smarter text handling flexible XML support and much more Written by pros for design pros

O. E. WILLIAMSON, 2018-07-02 Learn After Effects Scripts After Effects scripts are coded tools to automate processes that would be too tedious to do manually such as bulk renaming layers shifting certain shape layers importing text from a spreadsheet file or organizing your project structure In essence scripts can do the manual tasks you can do except faster It cannot do things you cannot do yourself plugins which are basically individual software within After Effects can do this In this article I will point you to all the resources you ll need to get started with scripting for Adobe products specifically After Effects scripting without having any knowledge of

programming so the learning curve was pretty steep If you re familiar with programming at all even if you ve taken a single intro course in school you should be more than sufficient Adobe apps use a language called ExtendScript which is just a modified version of JavaScript so if you re into web development you should feel right at home The process is not that vigorous once you have the fundamental programming concepts down like arrays objects functions recursions etc Best of luck on your scripting adventures After Effects scripts like expressions can be intimidating The code nature of these functions is often enough to make creative professionals shy away I m a motion designer not a programmer but don t be afraid When you start to understand the fundamentals of scripts in After Effects you ll see that it s not as complicated as you may have assumed This BOOK will help get you started
