Design Tools for Evidence-Based Healthcare Design Michael Phiri, 2014-12-05 The growing movement towards evidence based healthcare design has largely emphasised a change of culture and attitudes It has advocated for new ways of working but until now it has not focused on equipping healthcare clients and their designers with the practical means to exploit the potential benefits from evidence based architectural design Development of indicators and tools that aid designers and users

Collates information that increases our understanding of these tools in order to be able to make the best use of them. Clarifies where during the various stages of a building's life from inception design construction occupation and re use these tools should be used in order to derive the benefits possible from evidence based design.
