

# NERVOUS SYSTEM POEM

Refined in their nervous systems, great men's souls

WENT AWAY, leaving behind great will.

The nervous system is the major controlling, regulatory and communicating system in the body.

It is the source of all mental activity including thoughts, feelings, and memory; the nervous system consists of the brain, spinal cord, sensory organs and all the nerves that connect these organs throughout the body.

The nervous system has many functions but all that matter

is to enable the body to interact with its environment in suitable manner.

It is responsible of the speed of movement.

And finally another it is capable of sensory responses.

The nervous system maintains both internal and peripheral nervous systems; the central nervous system is made up of brain and spinal cord and the peripheral is made of nerves that branch off from the spinal cord and extend to all parts of the body.
