*Transformation von Multiphysics-Modellen in einen FPGA-Entwurf für den echtzeitfähigen HiL-Test eingebetteter Systeme* Christian Köllner, 2014-09-03 Mit der vorliegenden Arbeit wird eine durchgängige Werkzeugkette von der Modellbildung physikalischer Simulationen bis zur Entwurfsautomatisierung für FPGA-basierte Echtzeitsimulationen etabliert. Modelica wurde als vielseitige intuitive und objektorientierte Sprache zur Modellbildung ausgewählt. Die entwickelte Werkzeugkette nutzt Methoden der High Level Synthese, um einen Entwurf in VHDL zu generieren. Dabei können sowohl Entwurfsflüsse in Fließkomma- als auch Festkomma-Arithmetik erzeugt werden. *Handbook of Operations Analytics Using Data Envelopment Analysis* Shih-Nan Hwang, Hsuan-Shih Lee, Joe Zhu, 2016-07-01 This handbook focuses on Data Envelopment Analysis (DEA) applications in operations analytics, which are fundamental tools and techniques for improving operation functions and attaining long-term competitiveness. In fact, the handbook demonstrates that DEA can be viewed as Data Envelopment Analytics. Chapters include a review of cross-efficiency evaluation, a case study on measuring the environmental performance of OECD countries, how to select a set of performance metrics in DEA with an application to American banks, a relational network model to take the operations of individual periods into account in measuring efficiencies, how the efficient frontier methods DEA and stochastic frontier analysis (SFA) can be used synergistically, and how to integrate DEA and multidimensional scaling. In other chapters, authors construct a dynamic three-stage network DEA model, a bootstrapping-based methodology to evaluate returns to scale and convexity assumptions in DEA, hybridizing DEA and cooperative games using DEA to represent the production technology, and directional distance functions to measure bank performance, an input-specific Luenberger energy and environmental productivity indicator, and the issue of reference set by differentiating between the uniquely found reference set and the unary and maximal types of the reference set. Finally, additional chapters evaluate and compare the technological advancement observed in different hybrid electric vehicles (HEV) market segments over the past 15 years, radial measurement of efficiency for the production process possessing multi-components under different production technologies, issues around the use of accounting information in DEA, how to use DEA environmental assessment to establish corporate sustainability, a summary of research efforts on DEA environmental assessment applied to energy in the last 30 years, and an overview of DEA and how it can be utilized alone and with other techniques to investigate corporate environmental sustainability questions. *Sustainable Value Chain Management* Michael D'heer, 2015-02-28 This book introduces the integrated management concept of Sustainable Value Creation, which delivers sustainability inside out from the core business. It is based on the premise that sustainability can provide a platform for growth if it is implemented in a company's products, services, and supply chains combined, also known as the Value Chain. Managing the Value Chain from the outset with a sustainability mindset subsequently allows profitable, economical, ecological, and societal growth. It combines the need for increased sustainability and its implementation in the operations of a company. The book addresses the following

issues How do economic environmental and societal factors impact the value creation process of a company What requirements and expectations need to be met to balance economic ecologic and societal value creation What are the building blocks and measures that can be utilized on the journey towards building a sustainable value chain What benefits can be achieved through sustainable value chains What are the practical examples of sustainable value chains in leading companies that can inspire others to follow The book includes contributions from the following organisations and companies Beiersdorf SAP Klenk und Horsch VAUDE Infineon Technologies Independent Capital Management BASF Nanogate the Federal German Council for Sustainable Development Henkel Symrise shared value chain Siemens Fairphone and Thin Air Factory

Hybrid Electric Vehicles Chris Mi,M. Abul Masrur,2017-09-11 The latest developments in the field of hybrid electric vehicles Hybrid Electric Vehicles provides an introduction to hybrid vehicles which include purely electric hybrid electric hybrid hydraulic fuel cell vehicles plug in hybrid electric and off road hybrid vehicular systems It focuses on the power and propulsion systems for these vehicles including issues related to power and energy management Other topics covered include hybrid vs pure electric HEV system architecture including plug in charging control and hydraulic off road and other industrial utility vehicles safety and EMC storage technologies vehicular power and energy management diagnostics and prognostics and electromechanical vibration issues Hybrid Electric Vehicles Second Edition is a comprehensively updated new edition with four new chapters covering recent advances in hybrid vehicle technology New areas covered include battery modelling charger design and wireless charging Substantial details have also been included on the architecture of hybrid excavators in the chapter related to special hybrid vehicles Also included is a chapter providing an overview of hybrid vehicle technology which offers a perspective on the current debate on sustainability and the environmental impact of hybrid and electric vehicle technology Completely updated with new chapters Covers recent developments breakthroughs and technologies including new drive topologies Explains HEV fundamentals and applications Offers a holistic perspective on vehicle electrification Hybrid Electric Vehicles Principles and Applications with Practical Perspectives Second Edition is a great resource for researchers and practitioners in the automotive industry as well as for graduate students in automotive engineering
