Audiovisual Speech Processing

Shawn L. Nissen

Audiovisual Speech Processing:

Audiovisual Speech Recognition: Correspondence between Brain and Behavior Nicholas Altieri, 2014-07-09 Perceptual processes mediating recognition including the recognition of objects and spoken words is inherently multisensory This is true in spite of the fact that sensory inputs are segregated in early stages of neuro sensory encoding In face to face communication for example auditory information is processed in the cochlea encoded in auditory sensory nerve and processed in lower cortical areas Eventually these sounds are processed in higher cortical pathways such as the auditory cortex where it is perceived as speech Likewise visual information obtained from observing a talker s articulators is encoded in lower visual pathways Subsequently this information undergoes processing in the visual cortex prior to the extraction of articulatory gestures in higher cortical areas associated with speech and language As language perception unfolds information garnered from visual articulators interacts with language processing in multiple brain regions This occurs via visual projections to auditory language and multisensory brain regions The association of auditory and visual speech signals makes the speech signal a highly configural percept An important direction for the field is thus to provide ways to measure the extent to which visual speech information influences auditory processing and likewise assess how the unisensory components of the signal combine to form a configural integrated percept Numerous behavioral measures such as accuracy e g percent correct susceptibility to the McGurk Effect and reaction time RT have been employed to assess multisensory integration ability in speech perception On the other hand neural based measures such as fMRI EEG and MEG have been employed to examine the locus and or time course of integration The purpose of this Research Topic is to find converging behavioral and neural based assessments of audiovisual integration in speech perception A further aim is to investigate speech recognition ability in normal hearing hearing impaired and aging populations As such the purpose is to obtain neural measures from EEG as well as fMRI that shed light on the neural bases of multisensory processes while connecting them to model based measures of reaction time and accuracy in the behavioral domain In doing so we endeavor to gain a more thorough description of the neural bases and mechanisms underlying integration in higher order processes such as speech and language recognition

Audiovisual Speech Processing Gérard Bailly, Pascal Perrier, Eric

Vatikiotis-Bateson, 2012-04-26 This book presents a complete overview of all aspects of audiovisual speech including perception production brain processing and technology

Audiovisual Speech Processing Luis Morís Fernández, 2016

Advances in Audiovisual Speech Processing for Robust Voice Activity Detection and Automatic Speech Recognition Fei Tao (Electrical engineer), 2018 Speech processing systems are widely used in existing commercial applications including virtual assistants in smartphones and home assistant devices Speech based commands provide convenient hands free functionality for users Two key speech processing systems in practical applications are voice activity detection VAD which aims to detect when a user is speaking to a system and automatic speech recognition ASR which aims to recognize what the

user is speaking A limitation in these speech tasks is the drop in performance observed in noisy environments or when the speech mode differs from neutral speech e g whisper speech Emerging audiovisual solutions provide principled frameworks to increase the robustness of the systems by incorporating features describing lip motion This study proposes novel audiovisual solutions for VAD and ASR tasks The dissertation introduces unsupervised and supervised audiovisual voice activity detection AV VAD The unsupervised approach combines visual features that are characteristic of the semi periodic nature of the articulatory production around the orofacial area The visual features are combined using principal component analysis PCA to obtain a single feature The threshold between speech and non speech activity is automatically estimated with the expectation maximization EM algorithm The decision boundary is improved by using the Bayesian information criterion BIC algorithm resolving temporal ambiguities caused by different sampling rates and anticipatory movements The supervised framework corresponds to the bimodal recurrent neural network BRNN which captures the taskrelated characteristics in the audio and visual inputs and models the temporal information within and across modalities The approach relied on three subnetworks implemented with long short term memory LSTM networks This framework is implemented with either hand crafted features or features representations directly derived from the data i e end to end system The study also extends this framework by increasing the temporal modeling by using advanced LSTMs A LSTMs For audiovisual automatic speech recognition AV ASR the study explores the use of visual features to compensate for the mismatch observed when the system is evaluated with whisper speech We propose supervised adaptation schemes which significantly reduce the mismatch between normal and whisper speech across speakers The study also introduces the Gating neural network GNN The GNN aims to attenuate the effect of unreliable features creating AV ASR systems that improve or at least maintain the performance of an ASR system implemented only with speech Finally the dissertation introduces the front end alignment neural network AliNN to address the temporal alignment problem between audio and visual features This front end system is important as the lip motion often precedes speech e g anticipatory movements The framework relies on RNN with attention model The resulting aligned features are concatenated and fed to conventional back end ASR systems obtaining performance improvements The proposed approaches for AV VAD and AV ASR systems are evaluated on large audiovisual corpora achieving competitive performance under real world scenarios outperforming conventional audio based VAD and ASR systems or alternative audiovisual systems proposed by previous studies Taken collectively this dissertation has made algorithmic advancements for audiovisual systems representing novel contributions to the field of multimodal processing

Robust Speech Recognition of Uncertain or Missing Data Dorothea Kolossa, Reinhold Haeb-Umbach, 2011-07-14

Automatic speech recognition suffers from a lack of robustness with respect to noise reverberation and interfering speech The growing field of speech recognition in the presence of missing or uncertain input data seeks to ameliorate those problems by using not only a preprocessed speech signal but also an estimate of its reliability to selectively focus on those

segments and features that are most reliable for recognition This book presents the state of the art in recognition in the presence of uncertainty offering examples that utilize uncertainty information for noise robustness reverberation robustness simultaneous recognition of multiple speech signals and audiovisual speech recognition The book is appropriate for scientists and researchers in the field of speech recognition who will find an overview of the state of the art in robust speech recognition professionals working in speech recognition who will find strategies for improving recognition results in various conditions of mismatch and lecturers of advanced courses on speech processing or speech recognition who will find a reference and a comprehensive introduction to the field The book assumes an understanding of the fundamentals of speech recognition using Hidden Markov Models

Cognitively Inspired Audiovisual Speech Filtering Andrew Abel, Amir Hussain, 2015-08-07 This book presents a summary of the cognitively inspired basis behind multimodal speech enhancement covering the relationship between audio and visual modalities in speech as well as recent research into audiovisual speech correlation A number of audiovisual speech filtering approaches that make use of this relationship are also discussed A novel multimodal speech enhancement system making use of both visual and audio information to filter speech is presented and this book explores the extension of this system with the use of fuzzy logic to demonstrate an initial implementation of an autonomous adaptive and context aware multimodal system This work also discusses the challenges presented with regard to testing such a system the limitations with many current audiovisual speech corpora and discusses a suitable approach towards development of a corpus designed to test this novel cognitively inspired speech filtering system

An Investigation of Audiovisual Speech Processing in Mandarin and English Subjects Shawn L. Nissen, 1998

Audiovisual Speech Processing and Listening Effort in Untreated Age-related Hearing Loss: Evidence from Functional Magnetic Resonance Imaging Christiane Thiel, Stephanie Rosemann, 2019

Robust Speech Recognition of Uncertain or Missing Data Dorothea Kolossa, Reinhold Haeb-Umbach, 2013-01-02 Automatic speech recognition suffers from a lack of robustness with respect to noise reverberation and interfering speech The growing field of speech recognition in the presence of missing or uncertain input data seeks to ameliorate those problems by using not only a preprocessed speech signal but also an estimate of its reliability to selectively focus on those segments and features that are most reliable for recognition This book presents the state of the art in recognition in the presence of uncertainty offering examples that utilize uncertainty information for noise robustness reverberation robustness simultaneous recognition of multiple speech signals and audiovisual speech recognition The book is appropriate for scientists and researchers in the field of speech recognition who will find an overview of the state of the art in robust speech recognition professionals working in speech recognition who will find strategies for improving recognition results in various conditions of mismatch and lecturers of advanced courses on speech processing or speech recognition who will find a reference and a comprehensive introduction to the field The book assumes an understanding of the fundamentals of speech recognition using Hidden Markov Models

Hearing and Seeing a

Speaker Elina Kaplan, 2018 In face to face conversations listeners process and combine speech information obtained from hearing and seeing the speaker talk Audiovisual speech typically leads to more robust recognition of speech as it provides more information for recognition but also as it helps listeners adjust to speaker idiosyncrasies The goal of the current thesis was to examine how certain perceptual and cognitive factors modulate how listeners use visual speech to facilitate momentary speech perception and to adjust to a speaker s idiosyncrasies Results showed that older listeners sensitivity to cross modal synchrony is related to the size of the audiovisual interactions during early perceptual processing Furthermore when experiencing asynchrony it was demonstrated that younger listeners adapted their speech perception to the current situation such that early neural interactions emerged Higher level mechanisms also modulated audiovisual speech processing We provide evidence that when listeners fixate the speaker s eyes as they typically do the gathered visual speech information can successfully facilitate early auditory processing Allocating covert attention to the mouth area is not needed We also demonstrated that the availability of working memory resources determines how quickly and thoroughly listeners can disambiguate visual speech to recalibrate phonetic categories to accommodate a speaker s idiosyncrasy In summary the studies in this thesis thus provide valuable insight into factors affecting the mechanisms involved in the processing of audiovisual speech Towards a Greater Understanding of the Neurophysiology of Natural Audiovisual Speech Processing

Michael J. Crosse, 2016 **Toward a Unified Theory of Audiovisual Integration in Speech Perception** Nicholas Altieri, 2010-09-09 Auditory and visual speech recognition unfolds in real time and occurs effortlessly for normal hearing listeners However model theoretic descriptions of the systems level cognitive processes responsible for integrating auditory and visual speech information are currently lacking primarily because they rely too heavily on accuracy rather than reaction time predictions Speech and language researchers have argued about whether audiovisual integration occurs in a parallel or in coactive fashion and also the extent to which audiovisual occurs in an efficient manner The Double Factorial Paradigm introduced in Section 1 is an experimental paradigm that is equipped to address dynamical processing issues related to architecture parallel vs coactive processing as well as efficiency capacity Experiment 1 employed a simple word discrimination task to assess both architecture and capacity in high accuracy settings Experiments 2 and 3 assessed these same issues using auditory and visual distractors in Divided Attention and Focused Attention tasks respectively Experiment 4 investigated audiovisual integration efficiency across different auditory signal to noise ratios The results can be summarized as follows Integration typically occurs in parallel with an efficient stopping rule integration occurs automatically in both focused and divided attention versions of the task and audiovisual integration is only efficient in the time domain when the clarity of the auditory signal is relatively poor although considerable individual differences were observed In Section 3 these results were captured within the milieu of parallel linear dynamic processing models with cross channel interactions Finally in Section 4 I discussed broader implications for this research including applications for clinical research and neural

biological models of audiovisual convergence Audio-visual Speech Processing for Multimedia Localisation Matthew Aaron Benatan,2016 **Audio-visual Speech Processing** Simon Lucey,2002 **IEEE ... Workshop on Multimedia Signal Processing** ,2004 *Spatial and Temporal Replication in Visual and Audiovisual Speech Recognition* Axel Monteiro,2003

Real World Speech Processing Jhing-Fa Wang,Sadaoki Furui,Biing-Hwang Juang,2004-03-31 Real World Speech Processing brings together in one place important contributions and up to date research results in this fast moving area The contributors to this work were selected from the leading researchers and practitioners in this field The work originally published as Volume 36 Numbers 2 3 of the Journal of VLSI Signal Processing Systems for Signal Image and Video Technology will be valuable to anyone working or researching in the field of speech processing It serves as an excellent reference providing insight into some of the most challenging issues being examined today **Calculation of 3D-stereo Features for Audiovisual Speech Recognition** Ignacio Garcia-Vaquero Millan,Alexander Vorwek,2009 *Proceedings of the International Conference on Audio-Visual Speech Processing 2011* Giampiero Salvi,Kungliga tekniska högskolan. Institutionen för tal, musik och hörsel,2011 *The Impact of Audiovisual Speech on Working Memory During Semantic Processing* Max Hebert,2013

Uncover the mysteries within Crafted by is enigmatic creation, **Audiovisual Speech Processing** . This downloadable ebook, shrouded in suspense, is available in a PDF format (Download in PDF: *). Dive into a world of uncertainty and anticipation. Download now to unravel the secrets hidden within the pages.

Audiovisual Speech Processing Introduction

In today's digital age, the availability of Audiovisual Speech Processing books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Audiovisual Speech Processing books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Audiovisual Speech Processing books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Audiovisual Speech Processing versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Audiovisual Speech Processing books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Audiovisual Speech Processing books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Audiovisual Speech Processing books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Audiovisual Speech Processing books and manuals for download

have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Audiovisual Speech Processing books and manuals for download and embark on your journey of knowledge?

FAQs About Audiovisual Speech Processing Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Audiovisual Speech Processing is one of the best book in our library for free trial. We provide copy of Audiovisual Speech Processing in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Audiovisual Speech Processing. Where to download Audiovisual Speech Processing online for free? Are you looking for Audiovisual Speech Processing PDF? This is definitely going to save you time and cash in something you should think about.
